## New Wholesale Portal features available in June.24 Release from 26. June 2024

The Wholesale Portal is subject to continuous improvements based customer feedback and operational experiences.

The target audience of this document are mainly Swisscom's Wholesale customers. It describes the most important changes per release. For a better overview, only the changes which require a different behaviour of the users are listed. Self-explaining minor changes are left out.

This document will be updated at every new release. Chapter 1 always contains the information related to the latest release. The subsequent chapters contain the information related to previous releases.

We want to improve the Wholesale Portal continuously in on regular sprints. Therefore, we appreciate any feedback and suggestions for improvements.

Please contact your contact persons within Swisscom Wholesale regarding any feedback and questions related to the Wholesale Portal.

### Important note:

Please refresh the page after the release by applying <F5> or by clearing the cache. Otherwise some of the new features may not be available.

## Table of contents

- 1 JUNE.24 RELEASE (AVAILABLE FROM 26.06.2024) ..... 5**
  - 1.1 DIA CONFIGURATION REPORT ..... 5
- 2 APR.24 RELEASE (AVAILABLE FROM 24.04.2024) ..... 7**

Remarks

Remarks

During the onboarding process, Swisscom will ask directly the person for whom the Badge or Key is being requested to upload additional documents.

Questions about badge & key request? Please contact

Contact

[flaechgebaeudeinfrastruktur@swisscom.com](mailto:flaechgebaeudeinfrastruktur@swisscom.com)

Send request

During the onboarding process, Swisscom will ask directly for whom the Badge or Key is being requested to upload additional documents, like:

- Passport photo
- Copy from Identity card or Passport
- Filled and signed document SECD-213, which is only available in German/French and Italian. Here are the different language versions
  - German: [SECD-213 SE Sicherheitsbestimmungen für externe Mitarbeitende \(Handwerker\)](#)
  - French: [SECD-213 SE Consignes de sécurité pour le personnel externe \(artisans\)](#)
  - Italian: [SECD-213 SE Disposizioni di sicurezza per collaboratori esterni \(artigiani\)](#)

The actual Functionality is a first Evolution to build up the main functionality for Colocation.

## 2.2 DataServices CES Orders: Email Notifications for Installation Partner

Within a Data Service CES order, the Installation Partner is newly informed about their installation order.

## 2.4 Remove Physical Access by termination of CES lines

When a CES line needs to be terminated, user has to confirm whether the related Physical Access can be removed after the last connectivity on this access is removed.

### Termination

#### Termination date

Termination date

ⓘ An early termination fee might apply if you are terminating the contract before the end of the subscription period.

#### Early Termination Fee

Requested Termination date	31.01.2025	<small>ⓘ Eventual network upgrade costs are not included in this fee for early termination and will therefore be charged retroactively if applicable.</small>
One time fee	0.-	

When the Physical Access is no longer used and the last connectivity has been removed, please confirm whether the Physical Access can also be removed.

Delete the related Physical Access \* ⓘ

Yes  No

Do you have questions or problems terminating the line? Please contact our support.

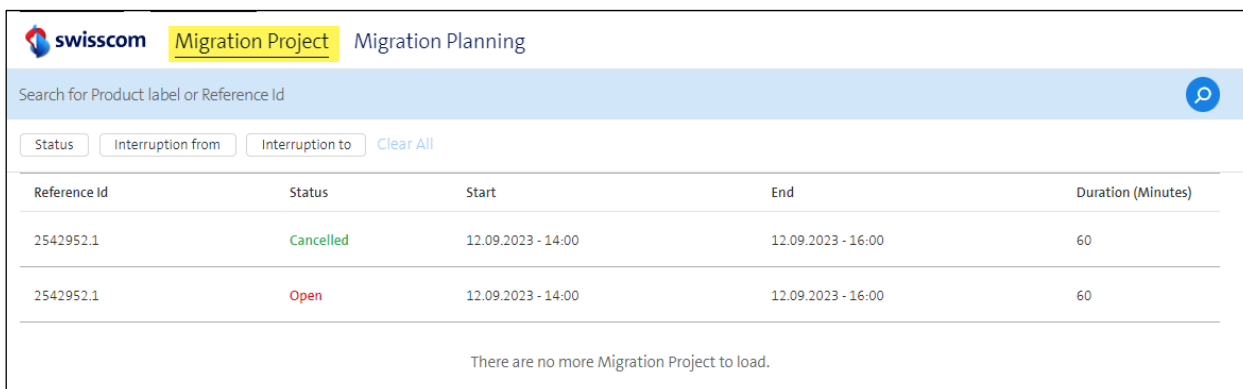

Order Management Wholesale  
[entry.wholesale@swisscom.com](mailto:entry.wholesale@swisscom.com)

**3 Release 3.2.0.106 (available from 15.11.2023)**

**3.1 Power Off Interruption in Colocations**

From now on you can access the planned power interruptions in the Wholesale Portal, which you already receive today via email.

Planned power interruptions are listed as a new entry under Migration Project:

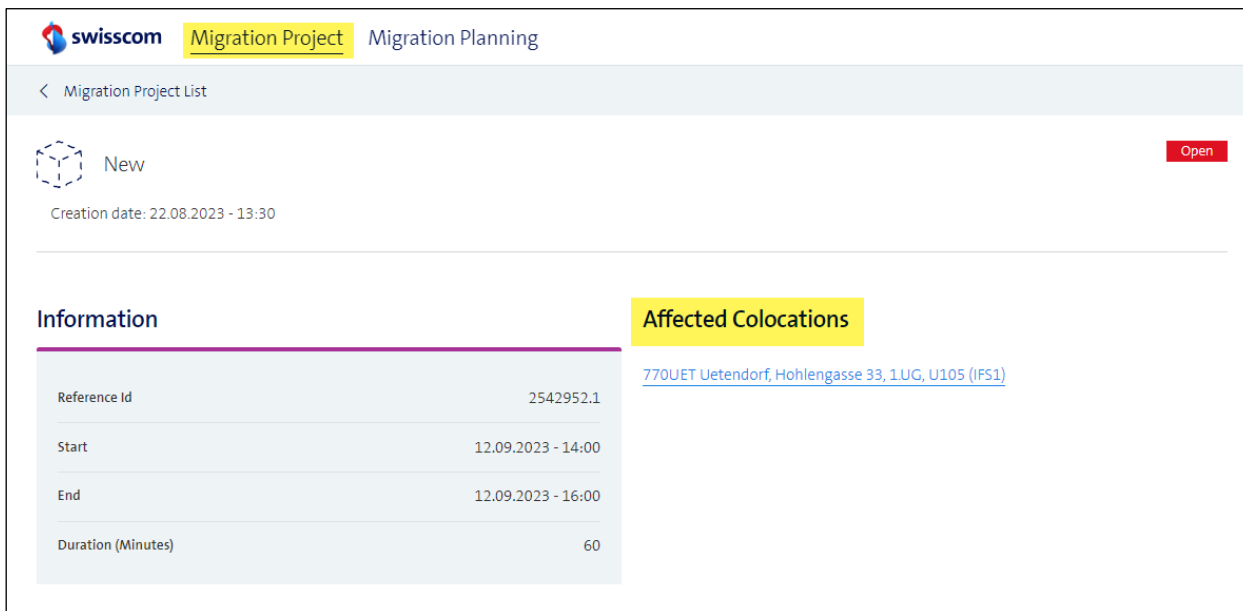

The screenshot shows the 'Migration Planning' interface with a search bar and filter buttons. Below the filters is a table with the following data:

Reference Id	Status	Start	End	Duration (Minutes)
2542952.1	Cancelled	12.09.2023 - 14:00	12.09.2023 - 16:00	60
2542952.1	Open	12.09.2023 - 14:00	12.09.2023 - 16:00	60

Below the table, it states: "There are no more Migration Project to load."

The detailed view of the migration project - in this case for the planned power interruption - contains the affected colocations, date, time and duration of the interruption:

The screenshot shows the detailed view of a migration project. It includes a 'New' button, a creation date of '22.08.2023 - 13:30', and two main sections: 'Information' and 'Affected Colocations'.

Information	
Reference Id	2542952.1
Start	12.09.2023 - 14:00
End	12.09.2023 - 16:00
Duration (Minutes)	60

**Affected Colocations**

[770UET Uetendorf, Hohlegasse 33, 1.UG, U105 \(IFS1\)](#)

### 3.2 One line address search

The address search capabilities have been simplified and the user can search with City names or Street names or HouseNames.

This new mechanism is available in all the places, where a verified address is provided.

Here is an example with Street Name search.

The screenshot shows a search interface with the title "Please enter an address". Below the title is a text input field containing "bahnstr". A dropdown menu is open, displaying four search results: "Bahnstr. 1, 8352 Elsau" (highlighted in blue), "Bahnstr. 1, 8610 Uster", "Bahnstr. 3, 8610 Uster", and "Bahnstr. 1, 6242 Wauwil".

Here is an example with City followed by street name search.

The screenshot shows a search interface with the title "Please enter an address". Below the title is a text input field containing "zurich bahnhofs". A dropdown menu is open, displaying four search results: "Bahnhofstr. 1, 8001 Zürich" (highlighted in blue), "Bahnhofstr. 2, 8001 Zürich", "Bahnhofstr. 3, 8001 Zürich", and "Bahnhofstr. 9, 8001 Zürich".

Here is an example with house name search.

The screenshot shows a search interface with the title "Please enter an address". Below the title is a text input field containing "Kiosk". A dropdown menu is open, displaying five search results: "Kiosk, 7550 Scuol" (highlighted in blue), "Kiosk Göbli, 6300 Zug", "Kiosk Welle, 3008 Bern", and "Kiosk Steinhof, 6300 Zug".

### 3.3 Merged Installed Base for CES

All the CES Multipoint and "Point to Point" lines are now shown under the product category "CES". In the earlier releases, they were shown separately.

## 4 Release 3.2.0.105 (available from 18.10.2023)

### 4.1 Migration Planning

Migration planning is there to let you know as early as possible when we are planning maintenance work, or switch overs – so called "Migration Projects", see chapter "Migration Project Customized Solution". It is not a finalized work, so you have the possibility to give us blocking periods, which we then consider in the final migration project. For example, because of a software release, an event or something else on your customer side. This helps us to react according to your customer request and to avoid short term vetoes.

#### 4.1.1 In Scope and Out Of Scope

But before we get started, you need to know:

- You will only receive migration planning for services on FTTH and FTTO infrastructure.
- You will only receive migration planning for services with an SLA higher than "Basic"
- You will only receive migration plannings for services CES, CLS and DIA
- You will not receive migration planning for services on the copper infrastructure.

#### 4.1.2 Process

How the User Journey looks like from the initial email notification to the submission of the blocking periods to our planning team in the Wholesale Portal will now be described.

### Step 1

You will be notified when a migration plan is published in wholesale:

New Migration Planning with Reference Id 99999999 - please provide blocking periods.

 virtual-server@swisscom.com  
An **role.plannedmaintenance@isp.com**

 Nachricht übersetzen in: Deutsch | Nie übersetzen aus: Englisch | [Übersetzungseinstellungen](#)

Dear Customer

We are planning a new migration project. Get more info here: <https://wholesale.swisscom.com/wholesaleportal/migrationproject/#/migration-planning>.  
Please review this migration with your customer and let us know any blocking periods by 27.09.2023 so that we can take them into consideration in our planning.  
By blocking period, we mean times when Swisscom is not allowed to carry out the migration project.  
You help us to avoid cancellation of the migration project at short notice.

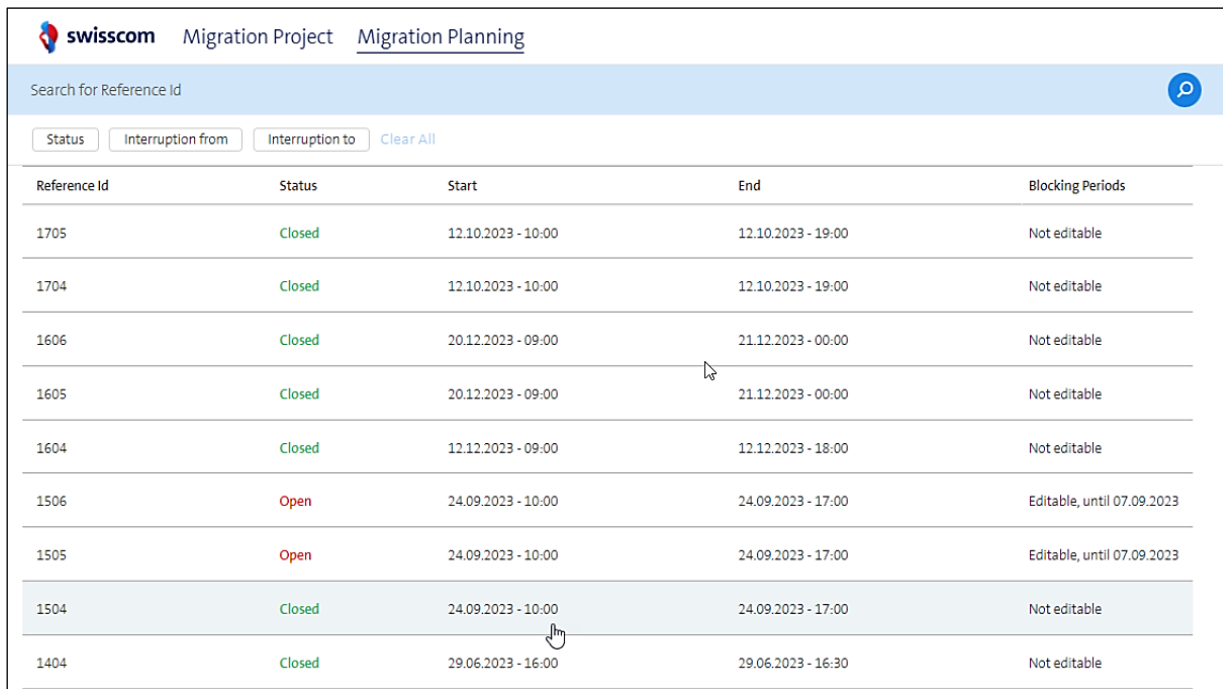

Kind regards,

Swisscom (Switzerland) Ltd.

**Step 2**

Via link you will get to the migration planning page. There, all migration planning is displayed in a list:

Reference Id	Status	Start	End	Blocking Periods
1705	Closed	12.10.2023 - 10:00	12.10.2023 - 19:00	Not editable
1704	Closed	12.10.2023 - 10:00	12.10.2023 - 19:00	Not editable

**Step 4**

On the 3rd working day, you will be notified via email and reminded that you still have the option to notify blocking times to Swisscom, regardless of whether you have already done so or not:

Migration Planning with Reference Id 999999125 - friendly reminder for blocking periods.

 CustomizedSolutionsServices.CWS@swisscom.com  
An **role.plannedmaintenance@isp.com**

 Nachricht übersetzen in: Deutsch |  Nie übersetzen aus: Englisch |  Übersetzungseinstellungen

Dear Customer

It is about this migration planning: <https://fwsacc.swisscom.com/wholesaleportal/migrationproject/#/migration-planning>.  
Please note that the time window for the blocking period information of your customers expires on 19.09.2023.  
By blocking period, we mean times when Swisscom is not allowed to carry out the migration project. It helps to avoid cancellation of the migration project at short notice.  
This is just a friendly reminder. If you have already provided the blocking periods, please ignore this email.

Kind regards,

Swisscom (Switzerland) Ltd.

## Step 5

On the 5th working day, you will be notified one last time via email to inform you that as of now no more blocking times can be entered for this migration planning and that any recorded blocking times have now been forwarded to the planning team.

Migration Planning with Reference Id 999999125 - blocking periods sent to planning team.

 CustomizedSolutionsServices.CWS@swisscom.com

Dear Customer

It is about this migration planning: <https://fwsacc.swisscom.com/wholesaleportal/migrationproject/#/migration-planning>.  
We have forwarded your blocking period information to the planning team. They will consider it when planning and finalizing the migration project.  
If you have not provided any blocking periods, please note that the time window has now expired and no more blocking periods can be provided.  
Either way, once the planning is complete and the migration project is finalized, we will inform you again.

Kind regards,

Swisscom (Switzerland) Ltd.

In the Wholesale Portal, migration planning is therefore displayed with status "Closed" and the option to manage blocking times is deactivated:

5 Release 3.2.0.103 (available from 22.09.2023)

5.1 CES Order Tracking

The customer satisfaction survey showed that there is a need for more information and clarity on the various appointments surrounding the processing of a new order.

For this purpose, we have considered an improved presentation of those appointment data by offering a tracking mode in the order list as well as enhanced data in the order detail view.

We have also made measures to keep you posted on all the interactions between your installation partner and Swisscom during the inhouse installation, as we have been told that it is not always entirely clear what the status is.

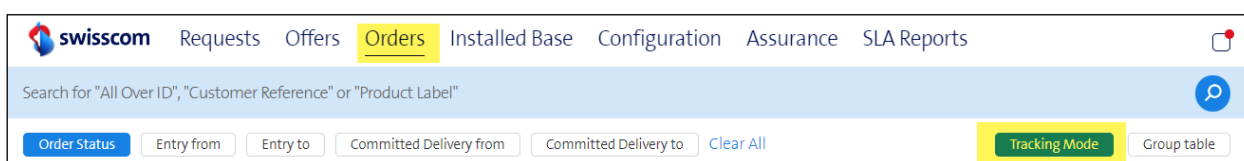

Please note that the following function can only be provided for CES orders for the time being. However, we are already working on providing this for CLS orders as well. The implementation date is still open.

5.1.1 Tracking Mode

A new order tracking over all CES orders is provided. To make it easier for you to distinguish between the different appointments, we have separated them by color:

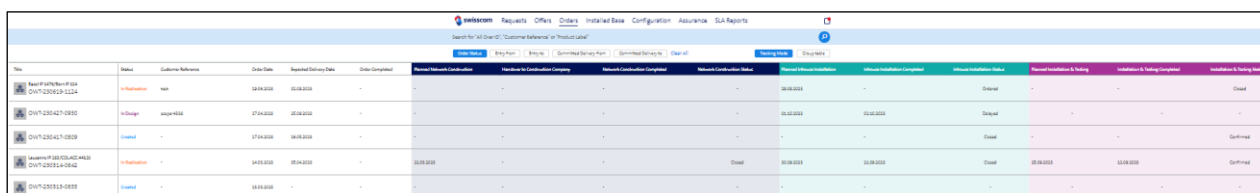

- **blue**: network construction (if network construction was required for the specific CES order)
- **green**: inhouse installation (to be done by your installation partner)
- **purple**: CPE installation or tests on site (the latter if "Direct Connect" was ordered)

The new "Tracking Mode" can be activated (and deactivated) at any time and optionally in the menu "Orders":

The screenshot shows the top navigation bar of the Swisscom portal with 'Orders' highlighted. Below the navigation bar is a search field and a row of filters. The 'Tracking Mode' filter is highlighted in yellow, indicating it is active. Other filters include 'Order Status', 'Entry from', 'Entry to', 'Committed Delivery from', 'Committed Delivery to', and 'Clear All'. A 'Group table' button is also visible on the right.

As the order tracking list with all dates expanded gets very wide, we provide a sticky row to ensure you can refer to the order at any time:

The screenshot shows a wide table with multiple columns for order tracking. The first row is highlighted in light blue, serving as a sticky header. The columns include: 'No.', 'Status', 'Customer Reference', 'Order Date', 'Planned Delivery Date', 'Order Generated', 'Network Construction', 'Hardware to be installed/Completed', 'Network Construction/Completed', 'Network Construction/Not Started', 'Planned Network Construction', 'Network Construction/Completed', 'Network Construction/Not Started', 'Planned Installation & Testing', 'Installation & Testing/Completed', 'Installation & Testing/Not Started', and 'Closed'. The table contains several rows of order data with corresponding dates and status indicators.

Following dates and information are displayed in the Tracking Mode:

Type	Appointment description	Wording within Tracking Mode
CES Order	Date on which the new order was created	Order Date
	Expected delivery date of the service according to service lead time/customer request	Expected Delivery Date
	New expected delivery date of the service according to postponement/customer change request	New Expected Delivery Date
	Date on which the new order was completed	Order Completed
	Status of the new CES order	Created, In Design, In Realization, Partly Completed, Completed
Network	autom. calculated delivery date of the network construction (unconfirmed date by now)	Planned Network Construction
	Date on which the network construction order was handed over to the construction company	Order Handover to Construction Company
	Completion report of the network construction	Network Construction Completed
	Status of the network construction	Ordered, In Design, In Realization, Closed
Inhouse Installation	autom. calculated delivery date of the inhouse installation	Planned Inhouse Installation
	Postponement of the planned inhouse installation according to installation partner feedback/missing feedback from the installation partner	Planned Inhouse Installation
	Date on which the inhouse installation was completed	Inhouse Installation Completed
	Comment of inhouse installation status	No wording, just use cursor and go over status to see the comment
Installation & testing	Status of the inhouse installation	Ordered, Rejected, Delayed, Closed
	Date agreed with the customer contact for the CPE installation or testing on site	Planned installation & testing
	Date on which Swisscom completed the CPE installation or testing on site	Installation & Testing Completed
	Status of the CPE installation or testing on site	Confirmed, Customer Pending, On Hold, Closed

### 5.1.2 Enhanced Order Detail View

The same as in tracker mode plus additional dates are also displayed in the order detail view. Additional dates in the order detail view:

- Network construction: Provisional Network Construction Date
- Network construction: Realistic Network Construction Date
- Network construction: Postponement Reason
- Inhouse Installation: Inhouse Installation Update (Comment)

Primary Access			
Site A Primary Access ⓘ			
Inhouse	Details	Inhouse Installation noch nicht erledigt. Tracking bei MCI	Completed
Installation	Date	05.06.2023	
	Delayed	12.06.2023	
CPE	Status	Planned	Completed
Installation			

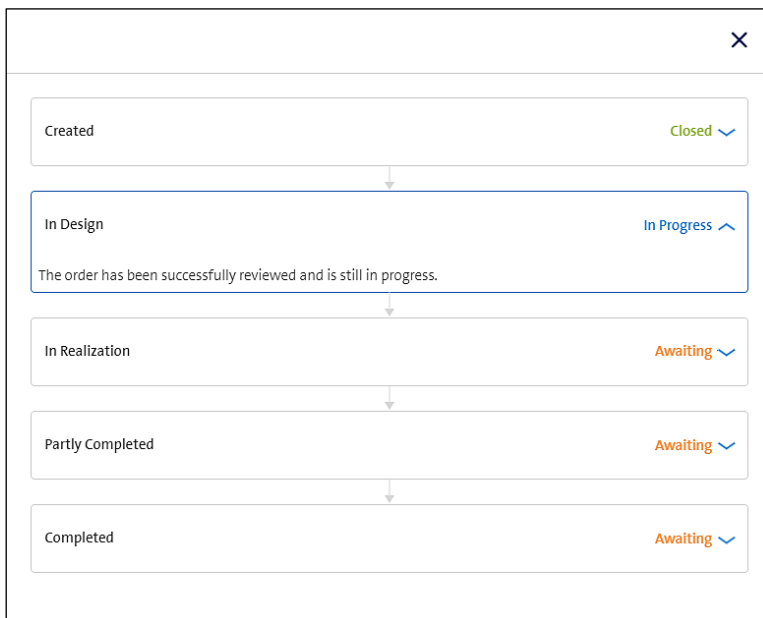

### 5.1.3 Status Modal

To better show you what tasks have been passed, what we are currently working on and what is still awaiting, please access the status modal. For each site we are expecting installations and construction we are showing a status modal. Simply click 'i' to open the status modal:

By default only the running task is unfolded:

If additional info is required simply unfold the tasks:

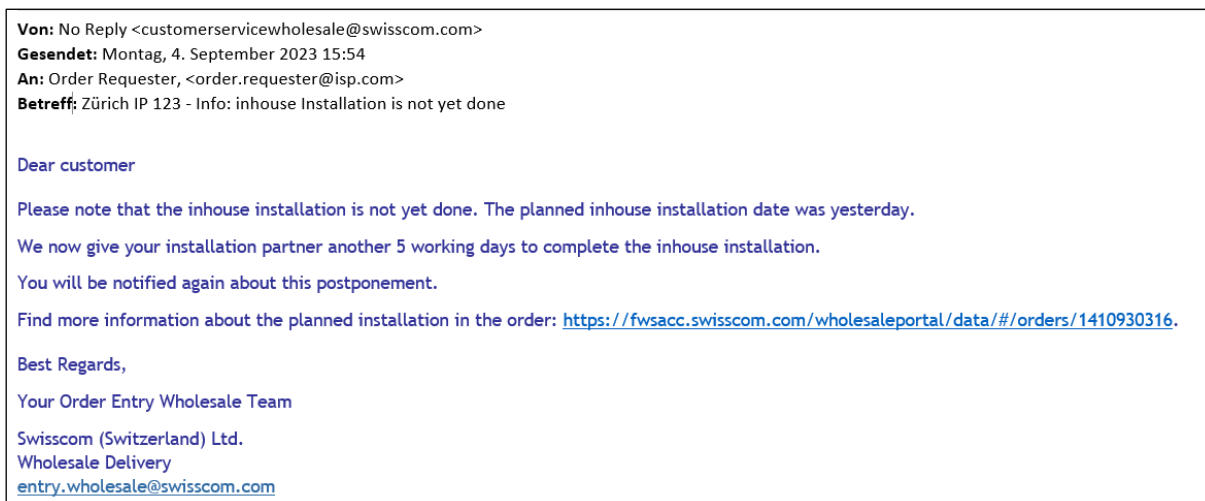

### 5.1.4 Inhouse Installation Improvements

In order to keep you posted during the inhouse installation, you will receive an email notification when the status or appointment changes. Also in case of missing feedback from the installation partner, we will inform you proactively.

See the flow how and when we are going to notify you:

Each email notification contains the link to the order detail view in the Wholesale Portal. See example:

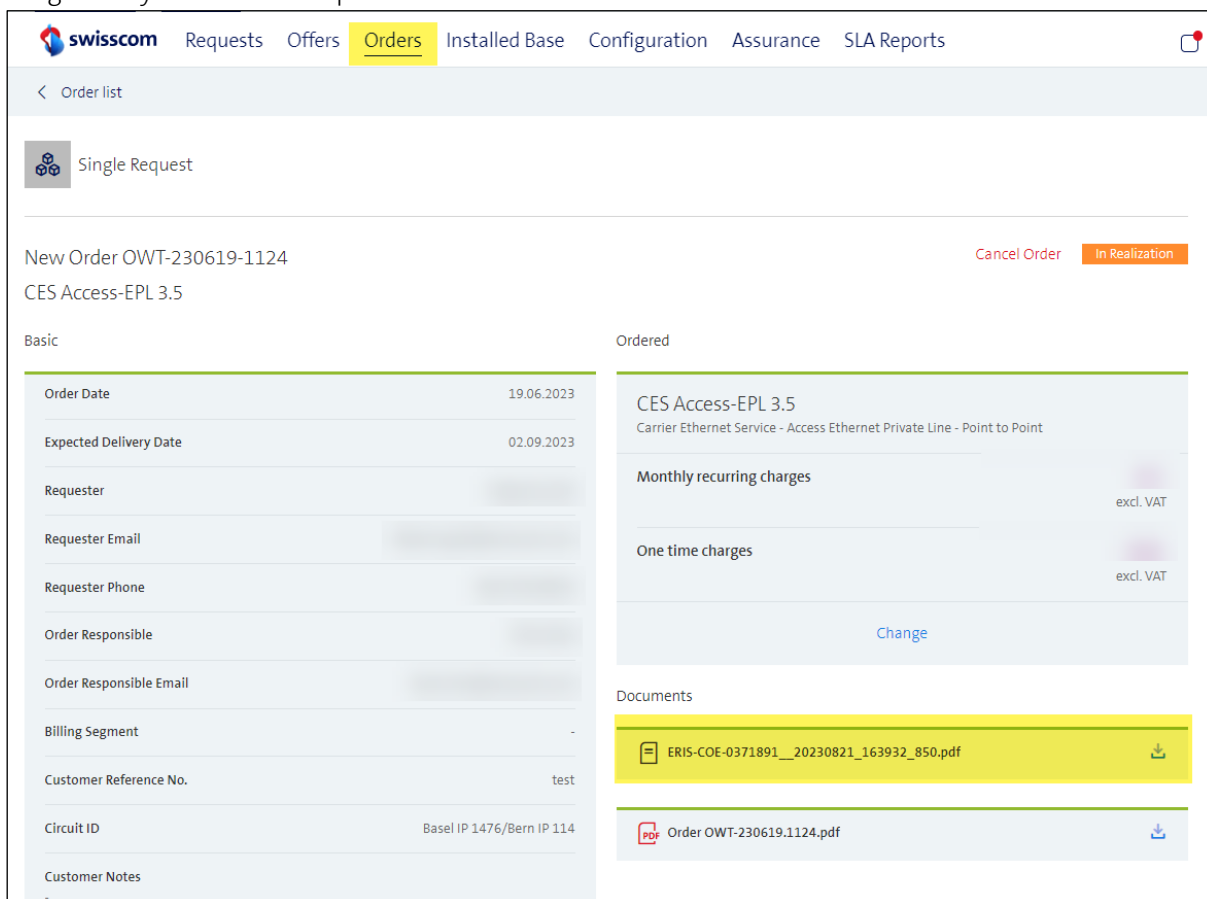

This notification will be sent to the email address that was specified when the order was placed.

Important: if you do not have a Wholesale Portal account yet, please contact your superuser to get information about the order at any time and to download the inhouse installation instruction as pdf.

### 5.1.5 Installation Instruction for CES orders

For CES orders, please find the installation instructions in the order detail page once the inhouse order is assigned to your installation partner:

The screenshot displays the 'Orders' section of the Swisscom web portal. The main content area shows details for a new order:

- Order ID:** New Order OWT-230619-1124
- Service:** CES Access-EPL 3.5
- Status:** In Realization (indicated by an orange button)
- Actions:** Cancel Order (red button)

The order details are organized into two columns:

- Basic:**
  - Order Date: 19.06.2023
  - Expected Delivery Date: 02.09.2023
  - Requester: [Redacted]
  - Requester Email: [Redacted]
  - Requester Phone: [Redacted]
  - Order Responsible: [Redacted]
  - Order Responsible Email: [Redacted]
  - Billing Segment: -
  - Customer Reference No.: test
  - Circuit ID: Basel IP 1476/Bern IP 114
  - Customer Notes: -

6 Release 3.2.0.96 (available from 22.03.2023)

6.1 Locations without OP and locations with OP without available fibers

Until now we have displayed locations without OP in the same way as locations with OP without free fibers.

To distinguish the situations, we now show sites with OP without free fibers differently.

As a reminder, how we display locations without OP:

CLS	
Copper	
Availability	Not available
Access Point Details	-
No. of Currently Free Lines	-
Max. Bandwidth	-
Service Lead Time in Work Days	-
Fiber	
Availability	Available with network upgrade
Access Point Details	None
No. of Currently Free Lines	n/a
Max. Bandwidth	100'000 M
Service Lead Time in Work Days	60
CES	
Fiber	
Availability	Available with network upgrade
Access Point Details	None
No. of Currently Free Lines	n/a
Max. Bandwidth	10'000 M
Service Lead Time in Work Days	55

Now, if the location has an OP but it does not have any available fibers, we will show the availability check new as follows:

CLS	
Copper	
Availability	Not available
Access Point Details	-
No. of Currently Free Lines	-
Max. Bandwidth	-
Service Lead Time in Work Days	-
Fiber	
Availability	Available with network upgrade
Access Point Details	OP:1725/79BAE
No. of Currently Free Lines	0
Max. Bandwidth	100'000 M
Service Lead Time in Work Days	60
CES	
Fiber	
Availability	Available with network upgrade
Access Point Details	OP:1725/79BAE
No. of Currently Free Lines	0
Max. Bandwidth	10'000 M
Service Lead Time in Work Days	55

It also includes the following remark:

- Currently there are no free fibers available on the OP. We check an OP splicing, OP extension or a network construction. We allow ourselves to offer possible expansion costs to you.

7 Release 3.2.0.89 (available from 19.10.2022)

7.1 Reopen Assurance Incident

If an Assurance Incident is set to status "Resolved", but the problem still exists, you now have the option to reopen the Incident within 72 hours (after reaching the status "Resolved"):

The screenshot shows the 'Incident list' page in the Swisscom Wholesale Portal. The incident 'Bern-Bern NP 2345' is shown with a status of 'Resolved'. A yellow warning box states: 'The problem is not resolved? You can reopen the incident until 20.10.2022 - 14:06 before it is automatically closed'. A green 'Resolved' button is visible. The incident details include:

- Incident ID: INC000009866035
- Reporting Date: 22.08.2022 - 14:41
- Incident reported by: [Redacted]
- Company: [Redacted]
- Closed time: 17.10.2022 - 14:06

Additional details shown:

- Customer Reference: test status notification
- Incident category: Bad Quality: Packet Loss
- Occurrence of incident: 22.08.2022 - 00:00
- End Customer Contact: -

Fields for 'What was done and analysed remotely?' and 'What was done and analysed on site?' both contain the text 'test'. A 'Worklog' section is present with an 'Add Worklog' button.

In the online form you can also provide us with information that could be important for the further troubleshooting process:

Reopen Request of Incident with ID INC000009866035 ✕

Incident ID\*

Product Label\*

Company\*

Incident reported by\*

Notes\*  
 ✓

After submitting the request, Swisscom will receive an email. Only after this mail has been processed the status will be reset from "Resolved" to "Assigned" and the troubleshooting will continue:

Wholesale Portal > Data Services > Select a company Logout

### 7.2 Private OP

From now on we show private OPs in the availability check. For data protection reasons we only show the OP number, without indication of the owner:

Result for Requested Connection	
<b>Site A Primary Access</b>	
Address	8005 Zürich Neugasse 18
Price zone	Top-City
CLS	
Copper	
Availability	Not available
Access Point Details	-
No. of Currently Free Lines	-
Max. Bandwidth	-
Service Lead Time in Work Days	-
Fiber	
Availability	Available
Access Point Details	OP:90225/79LIM;90171/79LIM;263/79LIM
No. of Currently Free Lines	>=4
Max. Bandwidth	100'000 M
Service Lead Time in Work Days	20
Private OP (Only available for dedicated customers) ⓘ	263
CES	
Fiber	
Availability	Available
Access Point Details	OP:90225/79LIM;90171/79LIM;263/79LIM
No. of Currently Free Lines	>=4
Max. Bandwidth	10'000 M
Service Lead Time in Work Days	15
Private OP (Only available for dedicated customers) ⓘ	263

If you are not sure whether the private OP belongs to your customer, you can leave a comment (including your customer's name) in the notes field during the firm offer request - we will be happy to clarify this for you.

If you are sure that the private OP belongs to your customer, you can also tell us that in the notes field of the firm offer request.

The screenshot shows a web form titled "Offer" with a close button (X) in the top right corner. The form contains the following elements:

- Title\***: A text input field containing "Release 3.2.0.89" with a green checkmark on the right.
- Notes\***: A text input field containing "This private OP xyz belongs to my customer 'Example AG'" with a green checkmark on the right. This field is highlighted with a yellow background.
- Who else should be notified about this offer? Additional e-mail addresses can optionally be entered here**: An empty text input field.
- What would you like to upload?**: A text input field.
- Upload Document(s)**: A light blue button.
- Create firm offer request**: A blue button at the bottom left.

If the private OP is the only available OP, we disable the "Direct Order" option - in this case we ask you to trigger a firm offer so that we can together determine whether the service can be provisioned on this OP or whether a network upgrade must be triggered.

**8 Release 3.2.0.85 (available from 20.07.2022)**

**8.1 SAP Types**

Service Access Point - SAP for short - means LAN (CES with CPE), WAN (CES Direct Connect) and Interface (CLS).

You can now specify the Service Access Point (or SAP Type) yourself in the CES order in the Wholesale Portal if several SAP Types apply to the options according to the price request/offer. Only values that apply to your selected option will be provided in the Wholesale Portal. The following attributes are decisive for the correct SAP Types:

- Product (CES or CLS)
- Medium (Copper or Fiber)
- Bandwidth
- CPE Model

A SAP Type must only be selected if a new physical connection is desired.

To give you a better idea of the SAP Types, we distinguish between the following use cases:

- CES High End
- CES High End Direct Connect
- CES Low End (LEC and LEF)
- CLS

**8.1.1 SAP Types – CES High End**

All SAP Types for CES High End are listed here:

Product	Medium	Bandwidth	CPE_Model	Physical Access	SAP Type	SAP Speed	SAP Duplex	SAP Negotiation
CES	any	2M	any	true	10/100/1000Base-T	10	full	nonegotiate

CES	any	10000M	none	true	10GBase-LR (ER)	N/A	N/A	any

**8.1.3 SAP Types – CES Low End (LEC und LEF)**

All SAP Types for CES Low End Copper and CES Low End Fiber are listed here:

Product	Medium	Bandwidth	CPE Model	Physical Access	SAP Type	SAP Speed	SAP Duplex	SAP Negotiation
CES Light	Copper	2M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	2M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	2M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	2M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	5/1M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	5/1M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	5/1M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	5/1M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	4M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	4M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	4M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	4M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	10/2M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	10/2M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	10/2M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	10/2M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	6M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	6M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	6M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	6M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate

CES Light	Copper	20/4M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	20/4M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	20/4M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	8M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	8M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	8M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	8M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	30/6M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	30/6M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	30/6M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	10M	LowRange	true	10/100/1000Base-T	10	full	nonegotiate
CES Light	Copper	10M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	10M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	10M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	40/8M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	40/8M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	40/8M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	20M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	20M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	20M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	50/10M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	50/10M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	50/10M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate

CES Light	Copper	30M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	30M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	30M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	100/20M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	100/20M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	100/20M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	50M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	50M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	50M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	200/40M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	200/40M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	70M	LowRange	true	10/100/1000Base-T	100	full	nonegotiate
CES Light	Copper	70M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	70M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate
CES Light	Copper	300/60M	LowRange	true	10/100/1000Base-T	1000	full	nonegotiate
CES Light	Copper	300/60M	LowRange	true	10/100/1000Base-T	auto	auto	negotiate

### 8.1.5 User Journey im Wholesale Portal

To give you an idea of what the new user journey in the Wholesale Portal looks like, we will show you an example of a CES High End order (100 M with physical access).

The SAP Types 10/100/1000Base-T, 1000Base-LX/LH and 10000Base-SX are provided in the order menu, whereby SAP Speed and SAP Duplex are also requested for the SAP Type 10/100/1000Base-T:

SAP

SAP type

10/100/1000Base-T

1000Base-LX/LH

10000Base-SX

SAP Speed		SAP duplex
<input checked="" type="radio"/> 100		full
<input type="radio"/> 1000		full
<input type="radio"/> auto		auto

CPE LAN Negotiation

No Negotiate

Save draft order

Send Order

Example: CES High End Order with 100M and physical access

## **8.2 Generic CES Price Request and Offer**

Important: the following function is not automatically activated on 20.07.2022. The activation requires a manual activation, customer by customer. As soon as this function is activated on your customer profile, we will inform you.

This change only affects customers using the Wholesale Portal GUI (customers using the B2B interface are not affected).

### **8.2.1 What is it all about?**

You no longer need to worry about whether you want a CES EVPL, EPL, Access EPL, Access EP LAN, EP LAN, EVP LAN in the price inquiry or quotation, especially since it makes no difference in terms of price.

From now on you can choose between the following Product Offerings

- CES Multipoint High End
- CES Multipoint Light
- CES Point-to-Point High End
- CES Point-to-Point Light
- CES Point-to-Point High End FMG
- CES Point-to-Point Light FMG

However, in the CES order, this service specific information is requested to ensure a correct service provision.

### 8.2.2 User Journey im Wholesale Portal

The user journey of a CES order in the Wholesale Portal therefore now looks like this:

< Request list

Single Request

---

Request test sap types with multiple options
Availability Check Delete Open

**Site A Primary Access**      1462 Yvonand  
rue de l'Ancien Collège 2  
(Customer Site)

**Secondary Access**

You haven't added any additional sites for Premium Platinum.

Add Secondary Access

---

If you would like to preconfigure your products or change existing configurations, please contact [accountteam.wholesale@swisscom.com](mailto:accountteam.wholesale@swisscom.com).

test product gr MP

Add individual option

☰ ☰ ☰

**CES Multipoint High End 3.4**

Service Level Agreement	Bandwidth	Subscription Period	Fulfillment Priority	Lead Time Work Days	Monthly recurring charges excl. VAT	One time charges excl. VAT	
<input type="checkbox"/> Basic	100 M	12 Months	Normal	75 Days	790.-	2'000.-	Direct Order

**CES Multipoint Light 3.4**

Service Level Agreement	Bandwidth	Subscription Period	Fulfillment Priority	Lead Time Work Days	Monthly recurring charges excl. VAT	One time charges excl. VAT	
<input type="checkbox"/> Basic Light	100 M	12 Months	Normal	75 Days	515.-	1'000.-	Order already in draft

Delete selected options
Select All   0 / max. 16 techn. items selected
Create firm offer request

Example: Price request of a CES Multipoint with 2 stored options (High End and Light)

After checking the price, you can request an offer as usual or proceed a so called "direct order" as of today. Regardless of which way you choose, a dropdown is provided in the order menu where you have to decide on a compatible value:

Service Type*
CES Access-EP-LAN Light
CES Access-EP-LAN Light
CES EP-LAN Light
CES EVP-LAN Light

Example: Dropdown of a CES Multipoint Light order

### 8.3 Click reduction Price Request

In order to improve the customer experience on the Wholesale Portal, we have reduced the number of clicks in the price request. You now only run through the availability check at the beginning. If you then add one or more options, the availability check is only executed in the background.

This allows you to focus fully on the configuration and the subsequent steps in the Wholesale Portal.

**9 Release 3.2.0.84 (available from 23.05.2022)**

The May Release 22 is dedicated to various small improvements – some you have reported to us. Thank you very much. We keep on introducing even more enhancements in the next releases.

**9.1 End customer contact information for termination orders**

For CLS or CES Physical Access terminations, end customer information will be requested to ensure clean order processing:

### Termination

#### Termination date

Termination date

#### Selected CES Physical Access Connection

Site A Primary Access	4123 Allschwil Baslerstr. 103
-----------------------	----------------------------------

**End Customer Contact**  
Please provide an end customer contact onsite:

First Name*	Last Name*
<input type="text"/>	<input type="text"/>
Email*	Phone Number*
<input type="text"/>	<input type="text" value="e.g. 0041 79 123 45 67"/>

#### Early Termination Fee

Requested Termination date	30.06.2022	ⓘ Eventual network upgrade costs are not included in this fee for early termination and will therefore be charged retroactively if applicable.
One time fee for early termination in CHF	-	

Do you have questions or problems terminating the line? Please contact our support.

Order Management Wholesale  
[entry.wholesale@swisscom.com](mailto:entry.wholesale@swisscom.com)

[Close](#)  I accept the aforementioned fee for early termination.

### 9.2 Multiple email addresses

From now on, you can enter multiple email addresses (max. 500 characters) for new orders, offer requests and incident reports. The separation between the email addresses is easily done using ;

The entered email addresses will be notified - like the order requester himself - in case of status changes and other updates.

#### Example "Offer Request":

The screenshot shows a web form titled "Offer" with a close button (X) in the top right corner. The form contains the following elements:

- Title\***: A text input field containing "Test" with a green checkmark on the right side.
- Notes**: An empty text input field.
- Additional Email Addresses**: A yellow highlighted section with the text "Who else should be notified about this offer? Additional e-mail addresses can optionally be entered here" and an empty text input field below it.
- Upload Section**: A section titled "What would you like to upload?" with a light blue button labeled "Upload Document(s)".
- Create Offer Request**: A blue button at the bottom left labeled "Create firm offer request".

### 9.3 CPE Model Modal

We have better described the CPE models to better assist you in the selection process:

CPE Model ✕

---

<u>Connection type</u>	<u>Power</u>	<u>Interface bandwidth</u>	<u>Interface type</u>
Direct Connect (DC)	Not applicable	Gigabit ethernet 10 Gigabit ethernet	100Base-SX, 1000Base-LX/LH, 1000Base-BX10 10GBase-SR, 10GBase-LR, 10GBase-ER
Low-end CPE Mid-range CPE	Single 230VAC Dual 230VAC, optional 48VDC	Gigabit ethernet	10/100/1000Base-T, 1000Base-SX, 1000Base-LX/LH, 1000Base-ZX
High-end CPE	Dual 230VAC, optional 48VDC	10 Gigabit ethernet	10/100/1000Base-T, 1000Base-SX, 1000Base-LX/LH, 1000Base-ZX 10GBase-SR, 10GBase-LR, 10GBase-ER

[Close](#)

### 9.4 Download order as pdf

You know the offer download as pdf? We now also provide this function for orders, modifications and terminations.

The screenshot shows a web interface for order management. At the top left, there is a back arrow and the text "Order list". Below this, the order details are displayed:

- New Order OWT-211208-0108** (with "Cancel Order" and "Created" buttons)
- CES EP-LAN 3.4**

The interface is divided into two main sections: "Basic" and "Ordered".

**Basic** section details:

Order Date	08.12.2021
Expected Delivery Date	29.04.2022
Requester	kkc kkc
Requester Email	release.notes@swisscom.com
Requester Phone	-
Order Responsible	-
Order Responsible Email	-
Billing Segment	My Billing Segment
Customer Reference No.	My Reference Number
Customer Notes	-

A "Change" button is located at the bottom of the Basic section.

**Ordered** section details:

- CES EP-LAN 3.4**
- Carrier Ethernet Service - Ethernet Private LAN - Multipoint
- The order is currently in progress. You will receive the price within the individual agreement.
- Service Level Agreement: Basic
- Bandwidth: 100 M
- Subscription Period: 12 Months
- Fulfillment Priority: Express

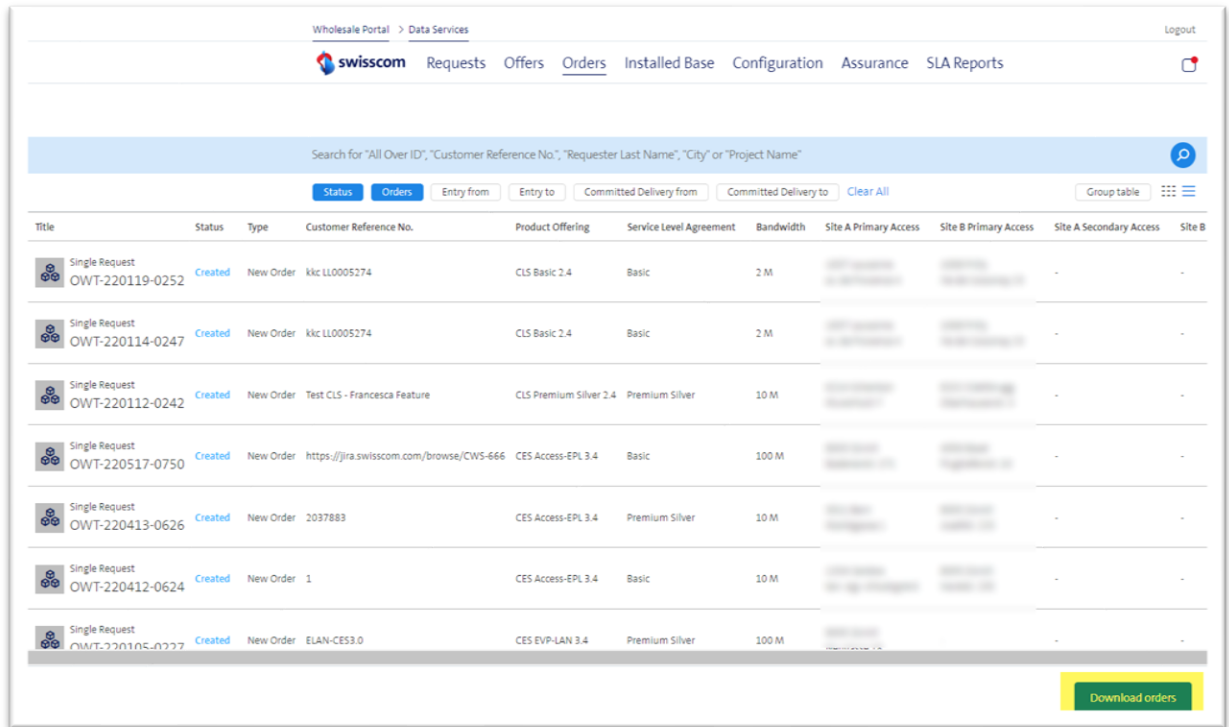

A "Change" button is located below the Ordered section details.

At the bottom of the interface, there is a yellow bar with a PDF icon and the text "Order OWT-211208.0108.pdf", followed by a download icon.

### 9.5 Download offer and order list as csv

You know the csv download function of the Installed Base? Now you can download the offer list and order list as csv as well.

The screenshot shows the 'Wholesale Portal' interface. At the top, there are navigation tabs: 'swisscom', 'Requests', 'Offers', 'Orders', 'Installed Base', 'Configuration', 'Assurance', and 'SLA Reports'. Below the navigation is a search bar with the placeholder text 'Search for "All Over ID", "Customer Reference No.", "Requester Last Name", "City" or "Project Name"'. Under the search bar, there are filters for 'Status' and 'Orders', and buttons for 'Entry from', 'Entry to', 'Committed Delivery from', 'Committed Delivery to', and 'Clear All'. A 'Group table' button is also present. The main content is a table with the following columns: Title, Status, Type, Customer Reference No., Product Offering, Service Level Agreement, Bandwidth, Site A Primary Access, Site B Primary Access, Site A Secondary Access, and Site B. The table contains seven rows of data, each representing a 'Single Request' with various details like OWT numbers, customer reference numbers, product offerings (e.g., CLS Basic 2.4, CLS Premium Silver 2.4, CES Access-EPL 3.4, CES EVP-LAN 3.4), service levels, and bandwidths. At the bottom right of the table, there is a yellow button labeled 'Download orders'.

Title	Status	Type	Customer Reference No.	Product Offering	Service Level Agreement	Bandwidth	Site A Primary Access	Site B Primary Access	Site A Secondary Access	Site B

**10 Release 3.2.0.82 (available from 20.04.2022)**

**10.1 Migration Project Customized Solution**

In this new app "Migration Project Customized Solution" we show all planned maintenance works that are open, closed or cancelled.

Example: entry page "Migration Project Customized Solution"

If you also have BBCS, TAL and/or ALO permissions, you will also see the entry link to "Migration Project Mass Market" which leads to <https://wholesale.swisscom.com/wsg/prod/infosrv/migration/proj-defs.do>.

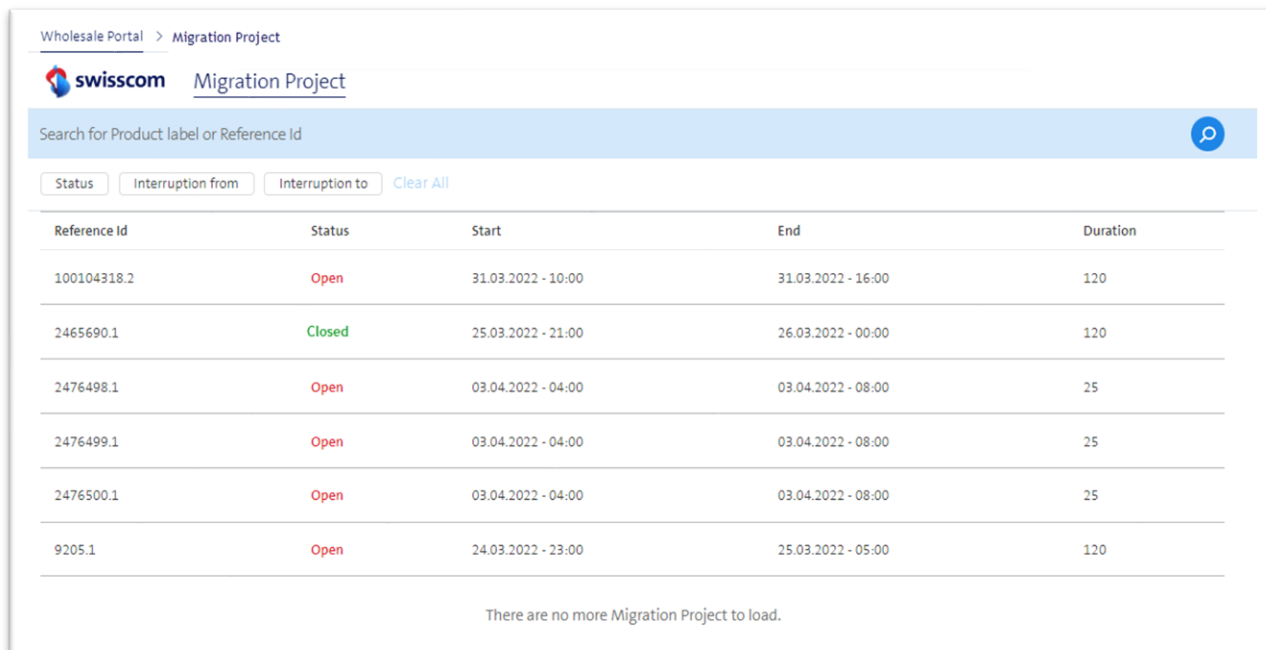

**10.2 Scope**

Please note that currently only planned maintenances are displayed for the CES Multipoint, CES Point-to-Point and CLS services.

The display of the maintenance work for CES Light and DIA will be delivered in a later release.

### 10.3 Migration Project overview

Landing page is the list of all planned maintenance works in state open, closed or cancelled:

Wholesale Portal > Migration Project

swisscom Migration Project

Search for Product label or Reference Id

Example: Migration Project detail view

See each service listed here is linked. Therefore, this will take you from the Migration Project detail page to the Installed Base detail page to get more information about the affected service.

The screenshot displays the 'Installed Base' configuration page for 'Genève-Satigny NP 2'. The page is divided into several sections:

- Navigation:** swisscom Requests Offers Orders Installed Base Configuration Assurance SLA Reports
- Single Request:** Genève-Satigny NP 2. Includes 'Change Configuration' and 'Terminate' buttons.
- Configuration Parameters:**
  - Customer Reference No.: Example 123
  - Product name: CLS Basic
  - Product version: 2.3
  - Bandwidth: 2M
  - Service Level Agreement: Basic
  - Subscription Start Date: 01.04.2017
  - Subscription Period: 12 months
- Migration Project:** A table with one entry:

Reference ID	Status	Start	End	Duration
<a href="#">1001.04318.2</a>	Open	31.03.2022 - 10:00	31.03.2022 - 16:00	120
- Reported incidents:** A section with a 'Report incident' button and the text 'There are no existing incidents available'.

Example: Installed Base detail view with one open Migration Project

If the Migration Project is in progress, the button "Report incident" is temporarily disabled. As soon as the maintenance work is finished (according to time "End") the report incident button is automatically enabled.

### 11 Release 3.2.0.79 (available from 26.01.2022)

#### 11.1 Network construction informations

Your CES or CLS order initiates a network construction at Swisscom and you need information about this construction project - this is exactly what we are addressing in Release 3.2.0.XX: transparent presentation of the various milestones, consideration of any schedule delays, supporting the construction progress with a status and proactive email notification of newly published information in the Wholesale Portal.

##### 11.1.1 Status

In order to better display the progress of a network construction, 4 new statuses are introduced in the "Network Construction" area (not to be mistaken with the status of the current CES/CLS order!):

- Ordered
- In Design
- In Realization
- Closed

Service		Planned	Completed
Commissioning		10.06.2022	
Primary Access			
Site A Primary Access			
Network	Status ⓘ	Planned	Completed
Construction	In Realization	25.05.2022	
Inhouse	Status	Planned	Completed
Installation	-	-	
CPE	Status	Planned	Completed
Installation	-	-	

Example: status "In Realization"

Each status contains different milestones:

- Ordered: the network construction has arrived at Swisscom, this is an automatically calculated construction date.
- In Design: the network design team verifies the feasibility, confirms the calculated network construction date, contacts the landlord and makes preparations for the handover for construction
- In Realization: the network construction has been ordered by the construction company, this is a provisional construction date for the time being. The construction company has checked the network construction and confirms the construction date.
- Closed: the construction company has reported the network construction as complete

You can call up this information at any time via the i-button. There you can also see where in the process the network construction is currently located:

Example: modal network construction in state "In Realization"

### 11.1.2 Milestones

Each milestone contains different information about the network construction, which you can call up in the hover (purple speech bubble) via cursor if required:

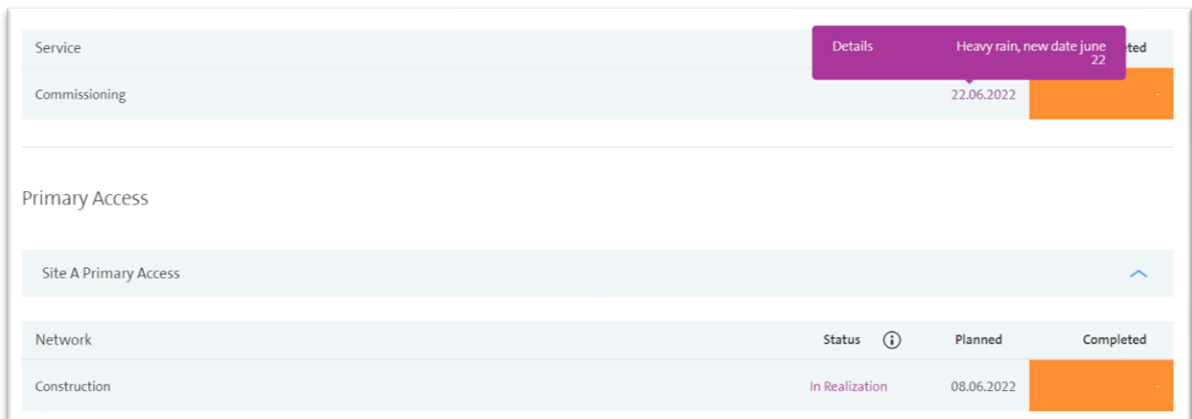

Example: "order handover to construction company. The provisional network construction date will be confirmed"

In this hover we make statements like:

- Which granularity level the planned network construction date has in each status
- When the construction company will classify the network construction date as provisional, respectively realistic
- Which task in the construction process has just been carried out

### 11.1.3 Postponement

If a postponement of the network construction affects the service commissioning date, we will list it there and support it with a hover function, which you can optionally call up to get more information about it:

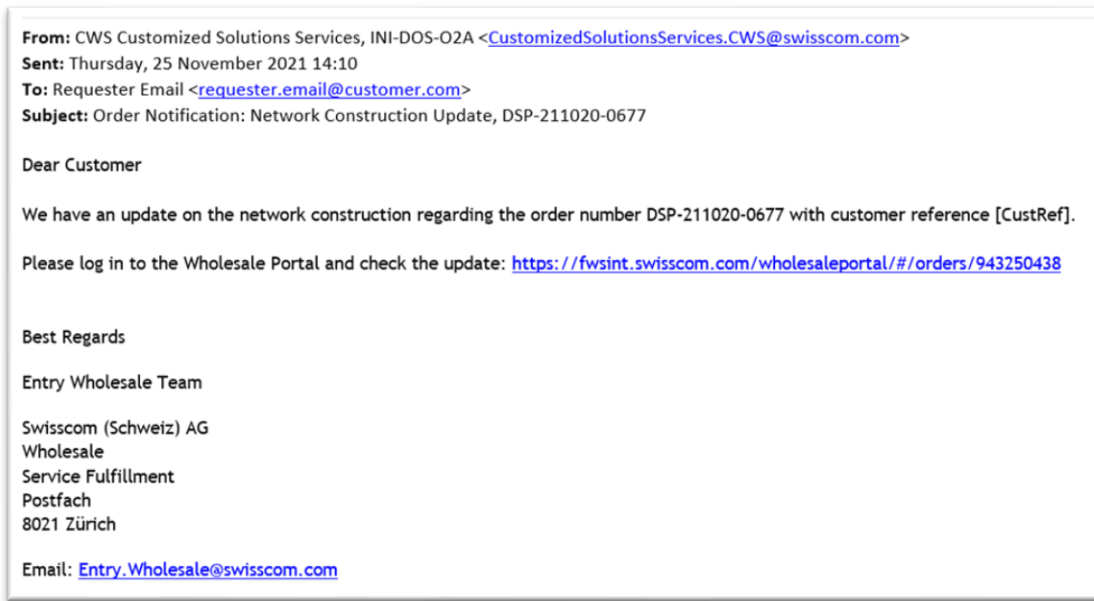

Example: postponement "Heavy rain, new date June 22"

#### 11.1.4 Email notification

Each event published in the Wholesale Portal automatically generates an email notification to the email address you provided in the order. This email contains as usual a link directly to the respective CES/CLS order where you can get the latest information:

Example: new network construction update available in the Wholesale Portal

#### 11.2 Availability on GUI

This feature will be provided exclusively to GUI customers until the March release on 23 March 2022. For the time being, B2B customers will only be notified and the WSDL will be handed over via the Account Management Team as of March Release 22.

12 Release 3.2.0.76 (available from 22<sup>nd</sup> September 2021)

12.1 Improvement of Express Activation

12.1.1 Create New Order

If your order has no network upgrade, includes a physical access and a bandwidth between 2 MB and 1 GB, then you can see in the date picker which delivery date triggers express costs and which does not.

The screenshot shows a 'Basic' form with the following fields and values:

- Expected Delivery Date\*: 22.09.2021 ✓
- Billing Segment: Test ✓
- Last Name\*: Muster ✓
- Requester Email\*: max.muster@wholesalecustomer.com ✓
- Customer Reference No.\*: xyz ✓

A date picker is open for 'Expected Delivery Date', showing a calendar for September 2021. A tooltip above the calendar reads: 'Express activation range. Additional costs of CHF 1500.00'. The tooltip highlights dates 22, 23, 24, and 25 in yellow, and dates 26, 27, 28, 29, 30, 1, and 2 in blue.

The screenshot shows the 'Basic' form with a yellow highlight on the 'Expected Delivery Date' field. The warning message reads: 'Expected delivery date is within the express activation range. Additional costs of CHF 1500.00 will apply'. The form fields and values are:

- Expected Delivery Date\*: 22.09.2021 ✓
- Billing Segment: Test ✓
- First Name\*: Max ✓
- Last Name\*: Muster ✓
- Requester Email\*: max.muster@wholesalecustomer.com ✓
- Requester Phone\*: 0041 79 111 11 11 ✓
- Customer Reference No.\*: xyz ✓

There is a 'Notes' field at the bottom of the form.

If you select a delivery date within the express range, we also ask you to confirm this cost by flag when submitting your order.

## 13 Release 3.2.0.71 (available from 16<sup>th</sup> June 2021)

### 13.1 Improvement of the Offer Expiry Handling

#### 13.1.1 Extend the validity of the offer

Do you need more time and you want to extend the validity of the offer? No problem, chat with us:

Would you like to add some options to this offer? Or do you want to extend the offer validity? Please get in touch with us, we will gladly help you. [Open chat](#)

Send Order

#### 13.1.2 Notification

we will inform you via email when:

- the validity of the offer expires in 2 weeks
- the offer has reached the expiration date

Important: If a draft order already exists (from the offer), the draft order is also automatically extended when the validity of the offer is extended. However, this also means that if the offer has expired, the draft order is automatically deleted and cannot be reopened.

### 13.2 Modification of the Installed Base

#### 13.2.1 Modifiable configurations

You can now modify the following configurations via Wholesale Portal:

- Customer Reference
- Subscription Period
- Service Level Agreement
- Bandwidth

This applies to CES Point-to-Point, CES Multipoint and CLS.

### 13.2.2 User Journey in the Wholesale Portal

Do you want to upgrade or downgrade the service and/or change the customer reference? Please go to the detailed view of the Installed Base and select "Change configuration":

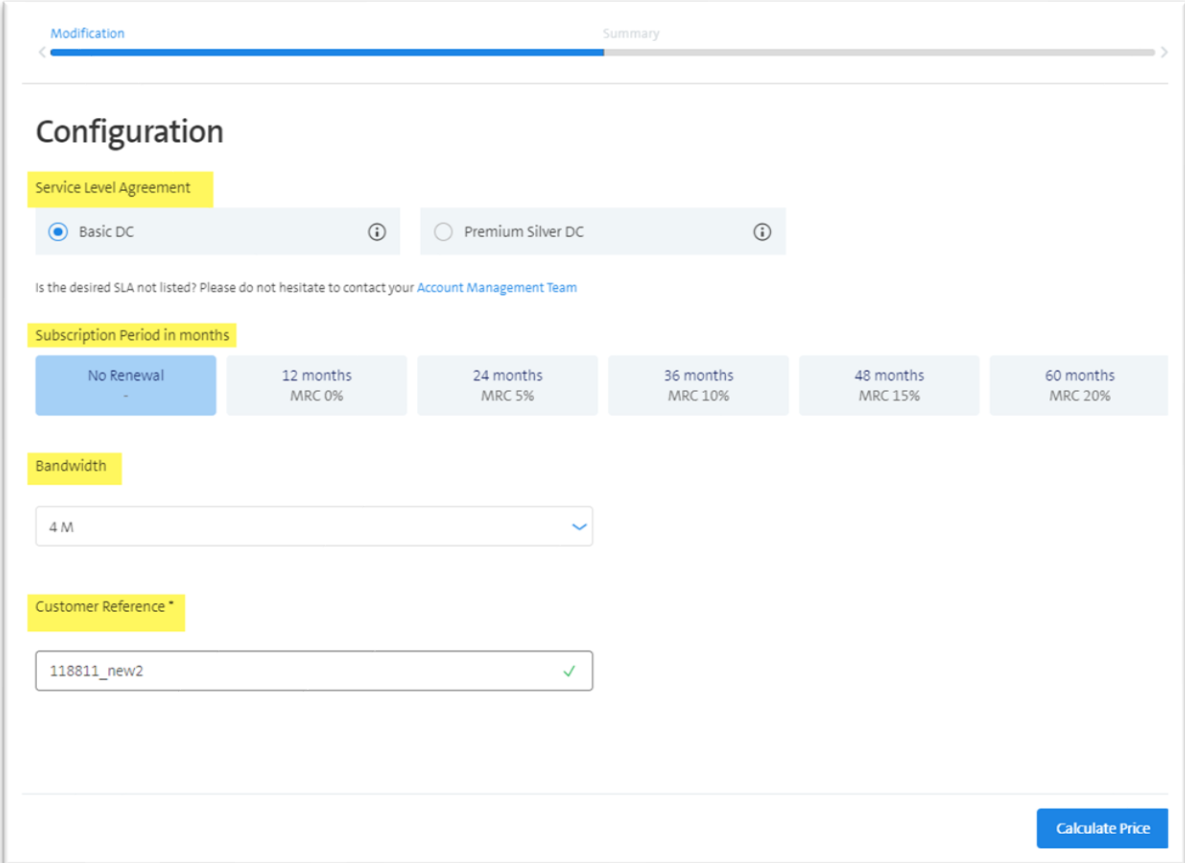

The screenshot shows a web interface for a 'Single Request' in the 'CES Multipoint installed base list'. The request details include:

- Customer: Brugg AG IP 124/CES:CON:100004793
- Service: CES EVP-LAN
- Related VLAN Service: [COL.SRV:2626](#)
- Primary Access

On the right side, there is a table of service details and two action buttons: 'Change Configuration' (highlighted in yellow) and 'Terminate' (in red).

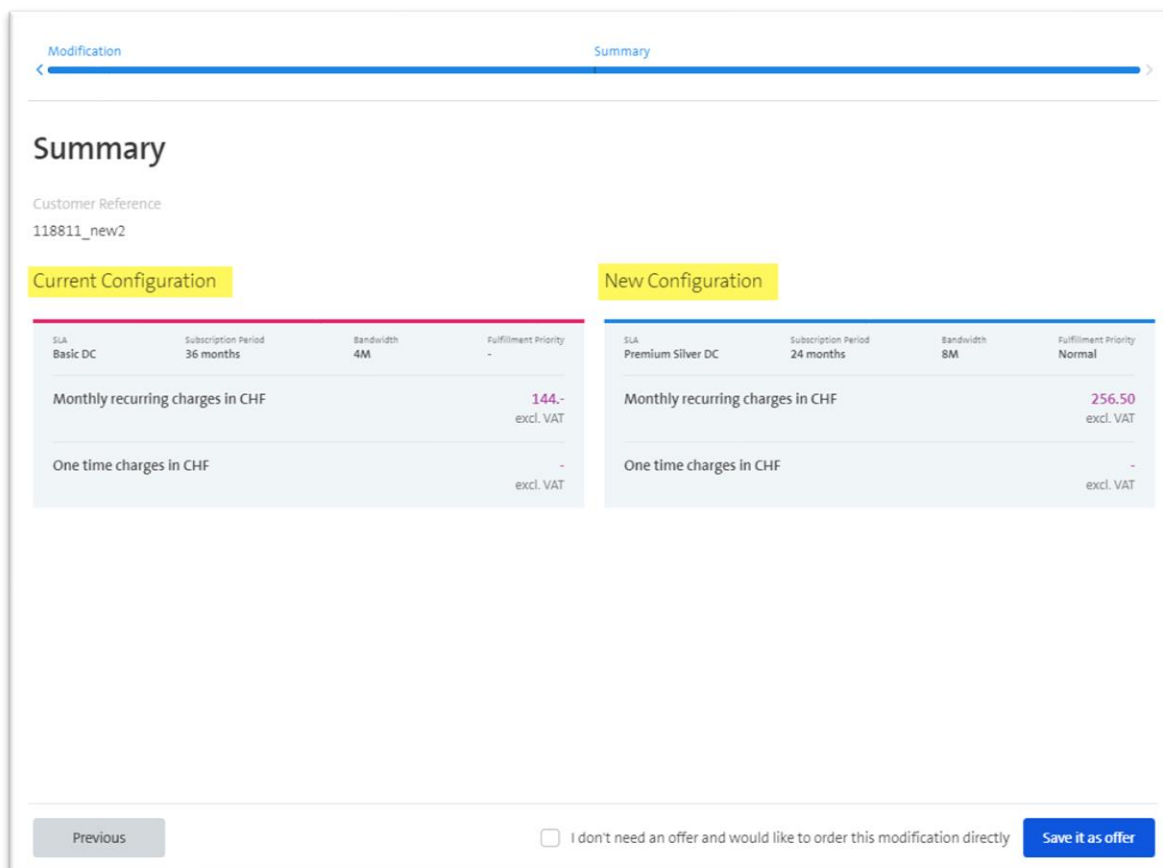

Customer Reference	118811_new2
Product name	CES EVP-LAN
Product version	3.0W
Bandwidth	4M
Service Level Agreement	Basic DC
Subscription Start Date	12.07.2017
Subscription Period	36 months

On the next page you will get to the configuration menu and you can reset the configuration:

Go to "Calculate Price" to get a summary of the new configuration.

In the summary, we compare the current and new configuration to provide a better idea of the price difference:

Modification Summary

Customer Reference  
118811\_new2

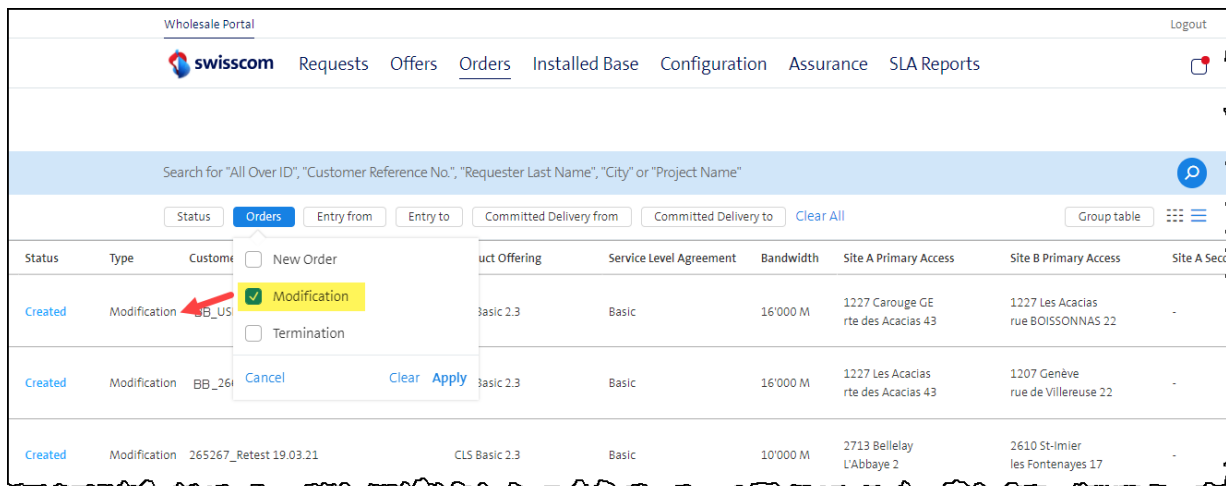

Current Configuration				New Configuration			
SLA	Subscription Period	Bandwidth	Fulfillment Priority	SLA	Subscription Period	Bandwidth	Fulfillment Priority
Basic DC	36 months	4M	-	Premium Silver DC	24 months	8M	Normal
Monthly recurring charges in CHF			144.- excl. VAT	Monthly recurring charges in CHF			256.50 excl. VAT
One time charges in CHF			- excl. VAT	One time charges in CHF			- excl. VAT

Previous  I don't need an offer and would like to order this modification directly [Save it as offer](#)

From now on, there are two options to proceed with the modification:

- Order the modification directly
- Save the modification as an offer, to order it later eventually

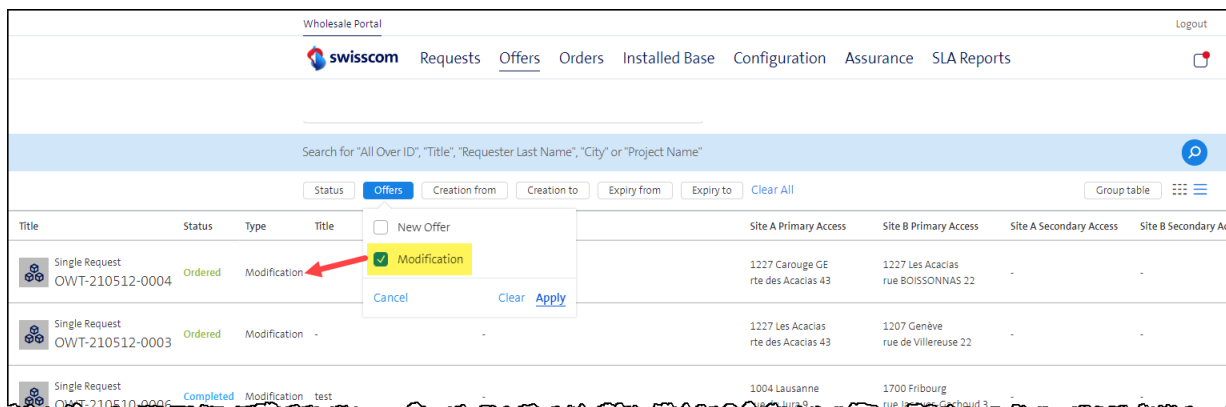

Modifications that you order directly or later from the offer, can be found again in the tab "Orders". To simplify the search, we provide "Modification" as an additional filter search:

The screenshot shows the 'Wholesale Portal' interface with the 'Orders' tab selected. A search bar at the top allows filtering by 'All Over ID', 'Customer Reference No.', 'Requester Last Name', 'City', or 'Project Name'. Below the search bar, there are filter buttons for 'Status', 'Orders', 'Entry from', 'Entry to', 'Committed Delivery from', 'Committed Delivery to', and 'Clear All'. A table of orders is displayed with columns for Status, Type, Customer, Product Offering, Service Level Agreement, Bandwidth, Site A Primary Access, Site B Primary Access, and Site A Secondary Access. A dropdown menu is open over the 'Type' column, showing options: 'New Order', 'Modification' (checked), 'Termination', and 'Cancel'. A red arrow points to the 'Modification' option in the dropdown.

Status	Type	Customer	Product Offering	Service Level Agreement	Bandwidth	Site A Primary Access	Site B Primary Access	Site A Secondary Access	Site B Secondary Access
Created	Modification	BB_US	Basic 2.3	Basic	16'000 M	1227 Carouge GE rte des Acacias 43	1227 Les Acacias rue BOISSONNAS 22	-	-
Created	Modification	BB_26	Basic 2.3	Basic	16'000 M	1227 Les Acacias rte des Acacias 43	1207 Genève rue de Villereuse 22	-	-
Created	Modification	265267_Retest 19.03.21	CLS Basic 2.3	Basic	10'000 M	2713 Bellelay L'Abbaye 2	2610 St-Imier les Fontenayes 17	-	-

The same applies to modifications that you save as an offer. You can find them in the tab "Offers" - the filter search "Modification" assists you:

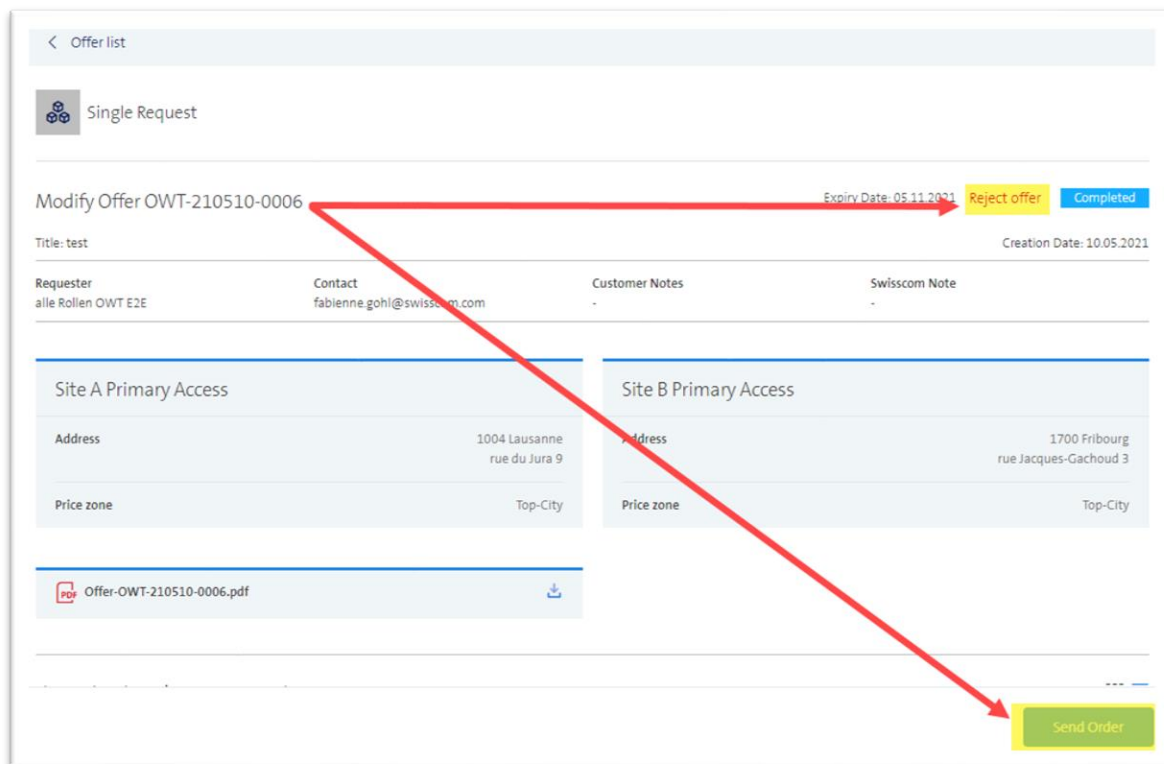

The screenshot shows the 'Wholesale Portal' interface with the 'Offers' tab selected. A search bar at the top allows filtering by 'All Over ID', 'Title', 'Requester Last Name', 'City', or 'Project Name'. Below the search bar, there are filter buttons for 'Status', 'Offers', 'Creation from', 'Creation to', 'Expiry from', 'Expiry to', and 'Clear All'. A table of offers is displayed with columns for Title, Status, Type, Title, Site A Primary Access, Site B Primary Access, Site A Secondary Access, and Site B Secondary Access. A dropdown menu is open over the 'Type' column, showing options: 'New Offer' and 'Modification' (checked). A red arrow points to the 'Modification' option in the dropdown.

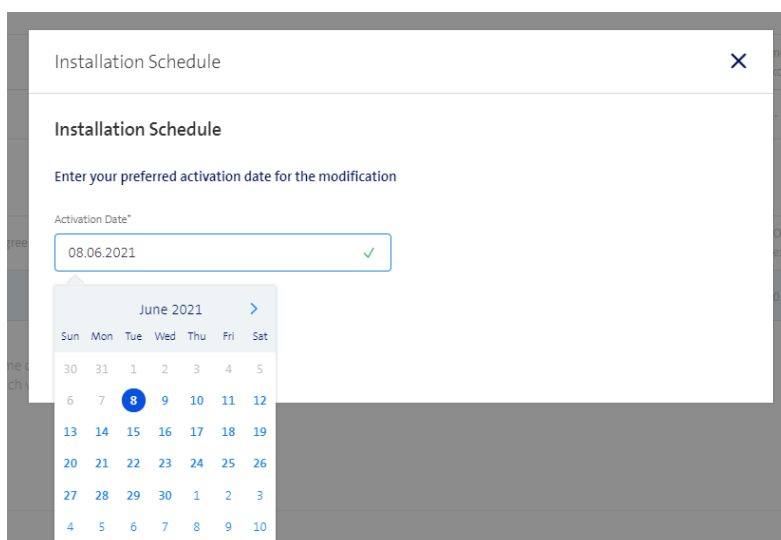

Title	Status	Type	Title	Site A Primary Access	Site B Primary Access	Site A Secondary Access	Site B Secondary Access
Single Request OWT-210512-0004	Ordered	Modification	-	1227 Carouge GE rte des Acacias 43	1227 Les Acacias rue BOISSONNAS 22	-	-
Single Request OWT-210512-0003	Ordered	Modification	-	1227 Les Acacias rte des Acacias 43	1207 Genève rue de Villereuse 22	-	-
Single Request OWT-210510-0006	Completed	Modification	test	1004 Lausanne rue de la Gare	1700 Fribourg rue de la Gare	-	-

If you have an offer saved for the modification, you can order or reject it:

Just enter an installation date and we will process the modification order for you:

A modification order passes the following statuses:

- Order Created
- Order In Realization
- Order Closed

As long as a modification is running, you cannot terminate the Installed Base (vice-versa, if a termination order is pending on the Installed Base). If the modification is finished, the Installed Base will be updated according to the new configuration (and the terminate Installed Base function would be available again).

### 13.2.3 Restrictions

Due to technical and complexity conditions, we would like to inform you about the following modification restrictions in the Wholesale Portal:

- CES Physical Access cannot be modified
- CES VLAN Services cannot be modified
- Relocation P2P cannot be modified\*
- CES with SLA Premium Platinum/Premium Platinum Light cannot be modified\*
- SLA of CES 2 and CLS cannot be modified\*

\*never mind, please contact the [Accountteam.Wholesale@swisscom.com](mailto:Accountteam.Wholesale@swisscom.com) via email for such modifications.

14 Release 3.2.0.69 (available from 19<sup>th</sup> May 2021)

14.1 Save Draft Order

Direct Orders or orders from an Offer can be temporarily saved as a draft if you have not yet completely filled in all the details:

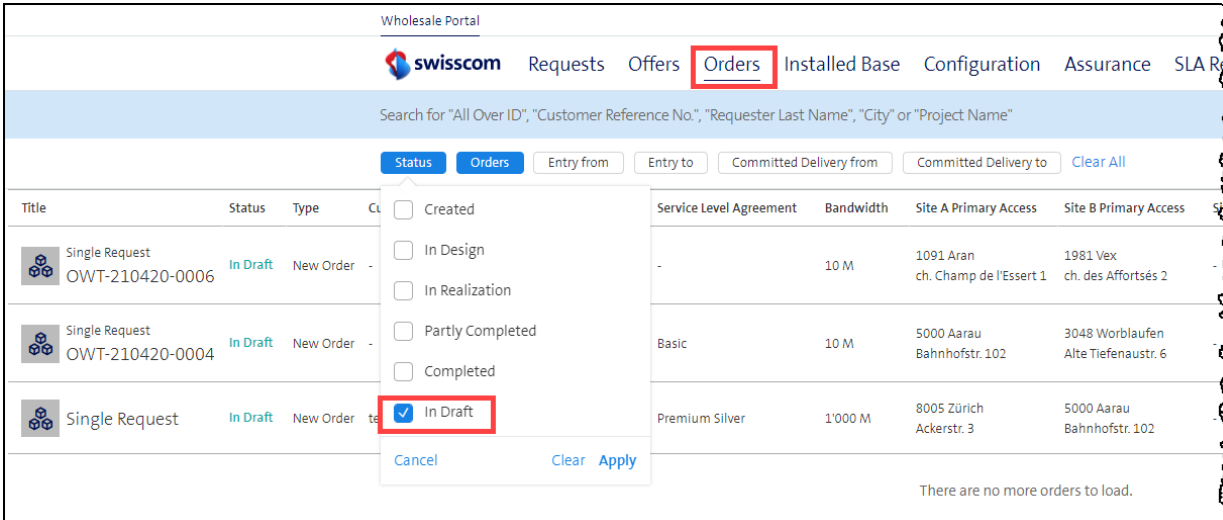

The screenshot shows a web form with a header area containing a grey box with the text "excl. VAT". Below this is a section titled "Primary Access". Under "Primary Access", there are two entries, each with a red warning icon and the text "Contains Mandatory Information". The first entry is "Site A Primary Access" and the second is "Site B Primary Access". At the bottom right of the form, there are two buttons: "Save draft order" (highlighted with a red rectangle) and "Send Order".

Don't worry, if you should forget to save the order as a draft, we will point this out when you leave the page. This is how we make sure that valuable information is not lost:

The warning dialog box has a title bar with the word "Warning" and a close button (X). The main text reads: "If you leave this page, all the already entered data will be deleted if you don't save it as draft. Are you sure you want to leave this page?". At the bottom, there are three buttons: "Save draft and leave" (highlighted with a red rectangle), "Leave without saving", and "Cancel".

### 14.2 Find Draft Orders

If you like to add further information to the order at a later point, you will find your draft under 'Orders' in the status 'In draft':

Title	Status	Type	Created	In Design	In Realization	Partly Completed	Completed	In Draft	Service Level Agreement	Bandwidth	Site A Primary Access	Site B Primary Access
Single Request OWT-210420-0006	In Draft	New Order	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	-	10 M	1091 Aran ch. Champ de l'Essert 1	1981 Vex ch. des Affortés 2
Single Request OWT-210420-0004	In Draft	New Order	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Basic	10 M	5000 Aarau Bahnhofstr.102	3048 Worblaufen Alte Tiefenastr.6
Single Request	In Draft	New Order	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Premium Silver	1'000 M	8005 Zürich Ackerstr. 3	5000 Aarau Bahnhofstr. 102

If you are not sure whether a draft order already exists for an Offer/Price Request, you can easily look up the respective Offer/Price Request and, if necessary, go directly to the draft order from there:

Would you like to add some options to this offer? Please get in touch with us, we will gladly help you. [Open chat](#)

A draft order already exists [See Draft](#)

With a click on the desired draft order, you will be taken directly to the editing mode and can thus start directly with further editing. Only when all the details have been filled in you can send the draft to Swisscom as an order.

### 14.3 Draft Order Validity

Draft orders are valid as long as the related Price Request/Offer. If a Price Request/Offer has expired, the draft order is automatically deleted and cannot be reactivated by Swisscom.

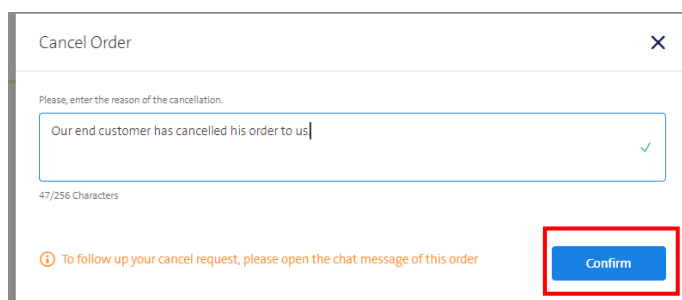

The screenshot shows the 'Wholesale Portal' interface. At the top, there is a navigation bar with the Swisscom logo and menu items: Requests, Offers (selected), Orders, Installed Base, Configuration, Assurance, and SLA Reports. A 'Logout' link is in the top right corner. Below the navigation bar, there is a breadcrumb trail: < Offer list. The main content area is titled 'Single Request' and displays details for 'Offer OWT-210420-0004'. The offer has an 'Expiry Date: 17.10.2021' (highlighted in yellow), a 'Reject offer' button, and a 'Completed' button. The title is 'Test Options luc' and the creation date is '20.04.2021'. A table below shows the requester 'alle Rollen OWT E2E' and contact 'fabienne.gohl@swisscom.com'. At the bottom, there are two sections for 'Site A Primary Access' (Address: 5000 Aarau) and 'Site B Primary Access' (Address: 3048 Worblaufen).

**15 Release 3.2.0.66 (available from 23<sup>rd</sup> March 2021)****15.1 Cancel running Order**

You have now the possibility to request to cancel a running order in the Wholesale Portal by applying the Cancel order button.

You have now the possibility to cancel running orders in the Wholesale Portal by applying the Cancel Order button.

A request to cancel a running order will be transmitted to Swisscom as a chat message to be further processed by a person.

The person handling the request to cancel will respond to you via the chat message.

## 15.2 Change running Order

You have now the possibility to submit a request to change a running order in the Wholesale Portal by applying the Change button on the respective card. Only one card can be changed in one Change Request. If you have multiple change requests, you need to submit one change request per card.

### 16.1.2 Restriktionen

Bei der Kündigung eines Services, eines Physical Access gibt es ein paar Restriktionen, die nun aufgeführt werden:

- Ein Physical Access kann nur gekündigt werden, wenn kein Service mehr darauf aktiviert ist.
- CES VLAN Services können nicht gekündigt werden
- Eine erfasste Kündigung kann nicht mehr gecancelled werden (Feature wird in 2020 umgesetzt, Release Info folgt. Bis dahin wenden Sie sich bitte schriftlich an unser Entry Wholesale Team)
- Allfällige Netzausbaukosten können nachträglich verrechnet werden und werden nicht im Portal angezeigt.
- Eine Kündigung kann frühestens erst in 30 Tagen ausgeführt werden. Danach täglich.
- Ein gekündigter Service/physical Access wird nicht mehr in der Installed Base aufgeführt

17 Release 3.2.0.17 (available from 27<sup>th</sup> March 2019)

17.1 Administration of Installation Partners

17.1.1 Register a new Installation Partner

You have now two new the possibility to register frequently used Installation Partners for later usage in orders. You do not have to enter all data again from the scratch in every order.

Within the configuration menu

While entering a new order

- Enter a new unique name of an Installation Partner and add it

Primary Access Site A Installation Partner

Company Name\*

Electric Partners Ltd|

Add "Electric Partners Ltd."

- Complete all data and add the new Installation Partner

Company Name\*

Electric Partner Ltd.

Street Building no City\* Postcode\*

Electricity Street 1 Electric Town 8888

First Name\* Last Name\* Phone Number\*

Jack Installator 0041 79 567 88 99

Fax Number Email\*

e.g. 0041 79 123 45 67 jack.installator@electric.com|

Would you like to save this installation partner in My Installation Partner? Add

### 17.1.2 Select the Installation Partner in an order

Registered Installation Partners will appear in the drop-down within every order.

Primary Access Site A Installation Partner

Company name\*

Installation AG, Custal Cudaphoon, 0041 98 765 43 21
Elektobilitz AG, John Electricman, 0041 12 345 66 77

You can select any registered Installation Partner. The related data will automatically be copied into the respective fields.

Primary Access Site A Installation Partner

Company name\*

Installation Partner Ltd.

Street\* Building no\* City\* Postcode\*

Installation Street ✓ 1 ✓ Installtown ✓ 888 ✓

First name\* Last name\* Phone number\*

Jack ✓ Installer ✓ 0041 98 765 43 21 ✓

Fax number\* Email\*

e.g. 0041 79 123 45 67 ✓ jack.installator@install.com ✓

Would you like to save this installation partner in My Installation Partner? **Add**

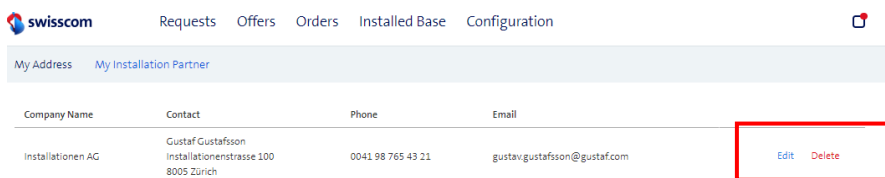

**Speichern**

There are two possibilities to store an Installation Partner within an order:

- **Use only once** – within the actual order; use only the button "Save" (one mouse click) and close the window. This Installation Partner will only be stored within the actual order.
- **Re-use later** – within future orders; use first the "Add button" to add the data to "My Installation Partner". Then save the data in the actual order (two mouse clicks) and close the window.

### 17.1.3 Modify and delete Installation Partners

Registered Installation Partners can be modified or deleted. **Modifying or deleting Installation Partners in the configuration has no impacts to running orders.**

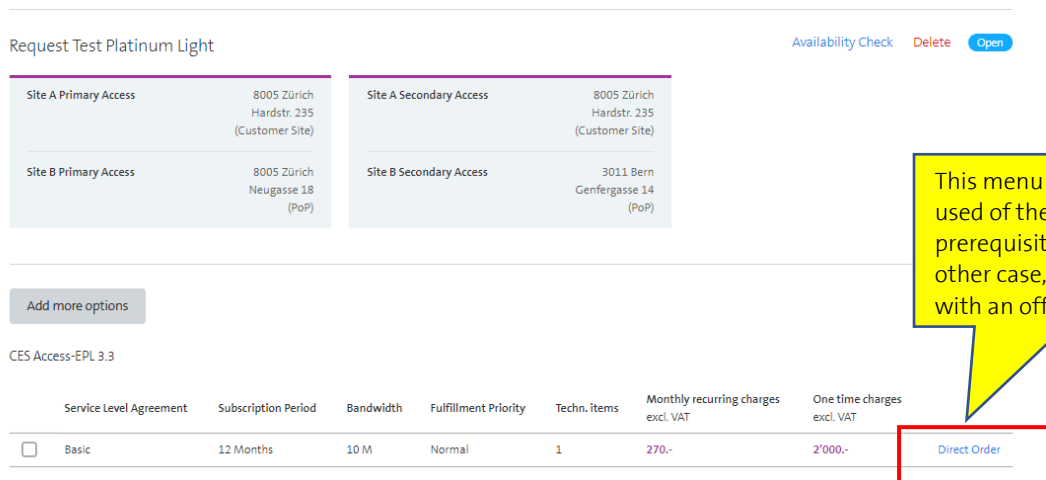

Company Name	Contact	Phone	Email	
Installationen AG	Gustaf Gustafsson Installationenstrasse 100 8005 Zürich	0041 98 765 43 21	gustav.gustafsson@gustaf.com	<a href="#">Edit</a> <a href="#">Delete</a>

### 17.2 Direct Order of Premium Platinum Light Services

A Direct Order of CES/CLS Premium Platinum Light is now possible if the following prerequisites apply:

1. At customer site, Primary and Secondary address must be identical
2. No network upgrade at customer site

These prerequisites do not apply to the PoP site. The assumption is that the required network equipment is already there, and no network upgrade will be necessary a PoP sites.

Request Test Platinum Light Availability Check Delete Open

<input type="checkbox"/> Basic	12 Months	10 M	Normal	1	270.-	2'000.-	<a href="#">Direct Order</a>

This menu button can only be used if the above-mentioned prerequisites apply. In any other case, please continue with an offer request.

### 17.3 Improvements to existing features

#### 17.3.1 Suppress addresses in Liechtenstein

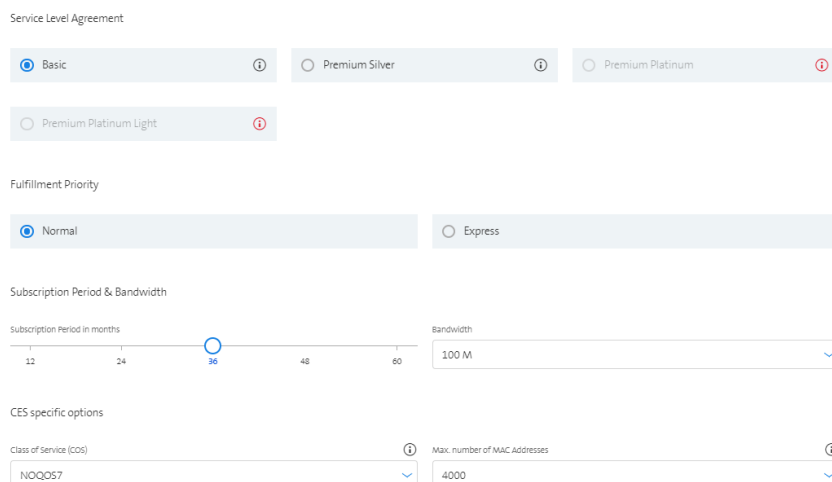

Swisscom (Switzerland) Ltd. do not provide any Data Services in Liechtenstein. Before, such addresses could be validated but no price could be calculated. Now, all addresses of Liechtenstein are suppressed from the beginning. (E.g. no address can be found in Vaduz)

#### 17.3.2 No reset of input parameters to default values

Before, all subsequent values had been reset to default values if a preceding value had been changed. After this release, all values remain unchanged if any of the values has been changed.

For example: If the SLA has been changed from Premium Silver to Basic, all subsequent values remain as before. (36 months not anymore reset to 12 months, 100M not anymore reset to 10M)

### 17.3.3 Limit the bandwidth of CES Light Copper as available at the specific site

The CES Light portfolio includes bandwidths up to 1000 Mbit/s. However, the maximum available bandwidth at a specific location may be lower due to limitations of the copper wire. In this example, only bandwidths up to **30 Mbit/s** can be provisioned.

CES Light	
<b>Copper</b>	
Availability	Available
Access Point Details	UP:1631/73KRE
No. of Currently Free Lines	>=4
Max. Bandwidth	30 M
Service Lead Time in Work Days	15
<b>Fiber</b>	
Availability	Not available
Access Point Details	None
No. of Currently Free Lines	-
Max. Bandwidth	-
Service Lead Time in Work Days	-

Consequently, only the bandwidths available at that location will appear in the Drop-Down. Here this means up to **30M**.

Bandbreite

10 M	
8 M	
10 M	✓
20 M	
30 M	

In this example, CES Light over copper is available up to 30M and CES Light over fibre is available up to **1'000M**. The fibre limit applies in such cases.

CES Light	
<b>Copper</b>	
Availability	Available
Access Point Details	UP:1667/64BUE
No. of Currently Free Lines	>=4
Max. Bandwidth	20 M
Service Lead Time in Work Days	15
<b>Fiber</b>	
Availability	Available
Access Point Details	BuildingEntryPointFTTH
No. of Currently Free Lines	1'000 M
Max. Bandwidth	1'000 M
Service Lead Time in Work Days	45

The Drop-down shows all values up to **1'000M**.

Bandbreite

10 M	
300 M	
500 M	
700 M	
1'000 M	

If only fibre is available all bandwidths up to **1'000M** can be selected.

CES Light	
<b>Copper</b>	
Availability	Not available
Access Point Details	-
No. of Currently Free Lines	-
Max. Bandwidth	-
Service Lead Time in Work Days	-
<b>Fiber</b>	
Availability	Available
Access Point Details	BuildingEntryPointFTTH
No. of Currently Free Lines	>=4
Max. Bandwidth	1'000 M
Service Lead Time in Work Days	45

### 17.3.4 Mail sent to requester after offer completion

Upon completion of an offer by the Sales Assistant, the requester receives a confirmation E-Mail. This E-Mail also contains the most important information related to that offer, as shown in the example below.

**Von:** CWS Customized Solutions Services, INI-DOS-DE-O2A  
**Gesendet:** Donnerstag, 21. März 2019 17:10  
**An:** Tester John, INI-CWS-CS-BEW <[john.test@swisscom.com](mailto:john.test@swisscom.com)>  
**Betreff:** Offer Test Confirmation Mail, GVS-190318-0002 is available

Dear Customer,

**18 Release 3.2.0.13 (available from the 25<sup>th</sup> February 2019)**

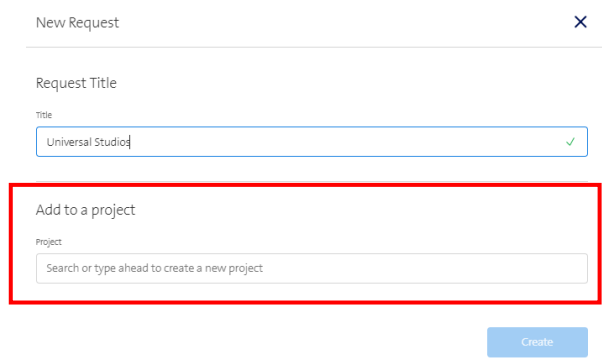

**18.1 Handling of projects**

**18.1.1 Significance of a project**

From now on, you can optionally assign Requests to a project. A project is a repository which links different Requests together. Various properties can be assigned to a project like project name or project discount (if applicable according to the Price Manual). These properties will then apply to all Requests, Offers, Orders and Installed Base instances assigned to that project.

**18.1.2 Assign a request to a project**

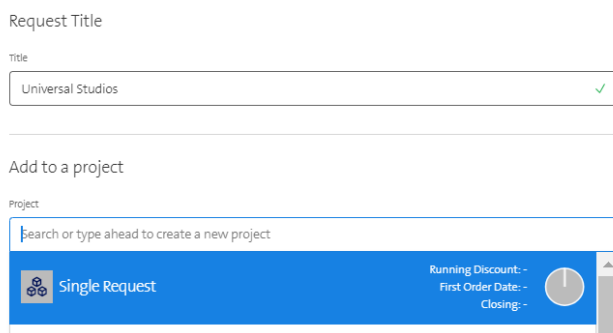

The first steps to create a Request have not changed. Like before, you will have to assign a unique name to a Request but there is now an additional field to enter the project name.

You have now three different options to proceed:

1. **Store as Single Request** without project relation (same behaviour as before)

Die option "Single Request" always appears first in the drop-down

### 2. Assign the Request to an existing project

All already existing and still active projects appear in the drop-down below the "Single Request".

Request Title

Title

 ✓

---

Add to a project

Project

P PMA Running Discount: - First Order Date: - Closing: -

### 3. Create a new project

You can also create a new project. In this case, the new project will be created at the same time when you create the request. When you create subsequent requests, the new project will appear in the drop-down.

Request Title

Title

 ✓

---

Add to a project

Project

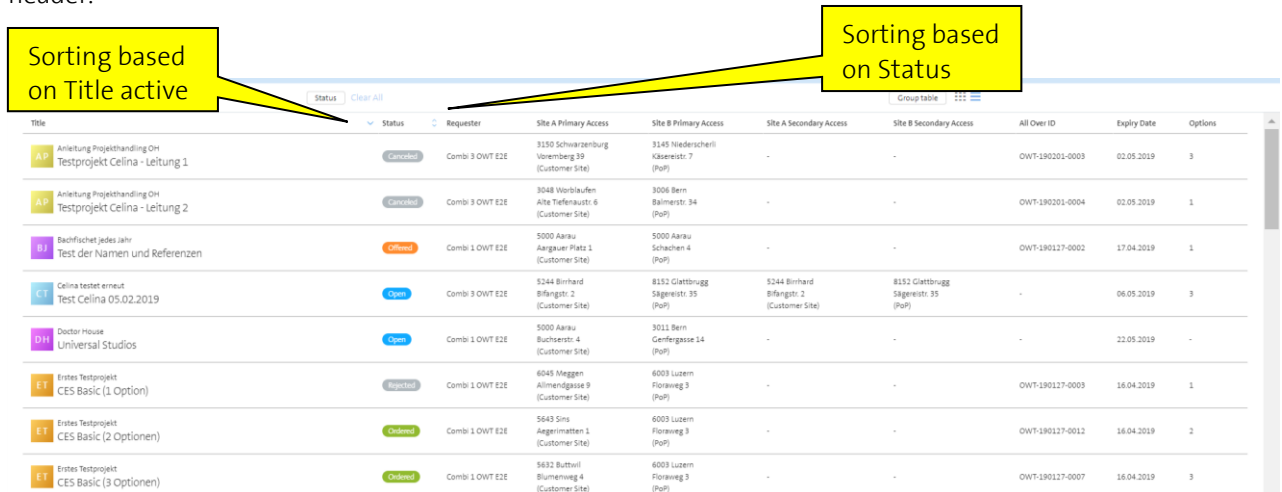

Create

#### Important Hint:

A project always involves some agreement between you and Swisscom about the applicable conditions. Consequently, the Direct Order is not possible for project related Requests. For project related Requests, the next process step is always the request of an Offer where the final commercial conditions will be fixed.

### 18.1.3 Sorting and grouping of stored Requests

You can sort the listed Requests based on different columns. Please use the respective symbols on the header.

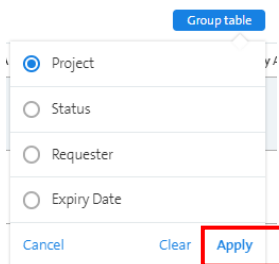

Sorting based on Title active

Sorting based on Status

## 18.2 Request Price of Premium Platinum Light

The SLA Premium Platinum Light is now also available in the price request.

Service Level Agreement

Basic  Premium Silver  Premium Platinum  Premium Platinum Light

The Prices for Premium Platinum Light and Premium Platinum are equal but the network upgrade costs may be lower in case of Premium Platinum Light or even not be applicable at all.

The only difference between Premium Platinum Light and Premium Platinum lies in the access area. In case of Premium Platinum Light there is no physical redundancy between the local switch and the customer site. Primary and secondary access are realised through the same cable.

### 18.3 Different Lead Times for Premium Platinum services

In case of a Premium Platinum Service, there can be a significant difference between the service delivery times of the primary access and the secondary access, due to network upgrades. In case of CLS, primary and secondary access will always be realised independently of each other. The primary access will get into services as soon as it is finished. In case of CES, you have the option to activate the primary access as soon as it is available or to wait with the service activation until the secondary access is finished. The next chapter explains how you can choose between one or the other option.

CES Access-EPL 3.3

Service Level Agreement	Subscription Period	Bandwidth	Fulfillment Priority	Service Lead Time	Monthly recurring charges excl. VAT	One time charges excl. VAT
<input type="radio"/> Premium Platinum	12 Months	10 M	Normal	Primary Access: 15 Days Secondary Access: 65 Days	561,60	14'000,-

CLS Premium Platinum 2.3

Service Level Agreement	Subscription Period	Bandwidth	Fulfillment Priority	Service Lead Time	Monthly recurring charges excl. VAT	One time charges excl. VAT
<input type="radio"/> Premium Platinum	12 Months	2 M	Normal	Primary Access: 20 Days Secondary Access: 70 Days	1'197,60	15'200,-

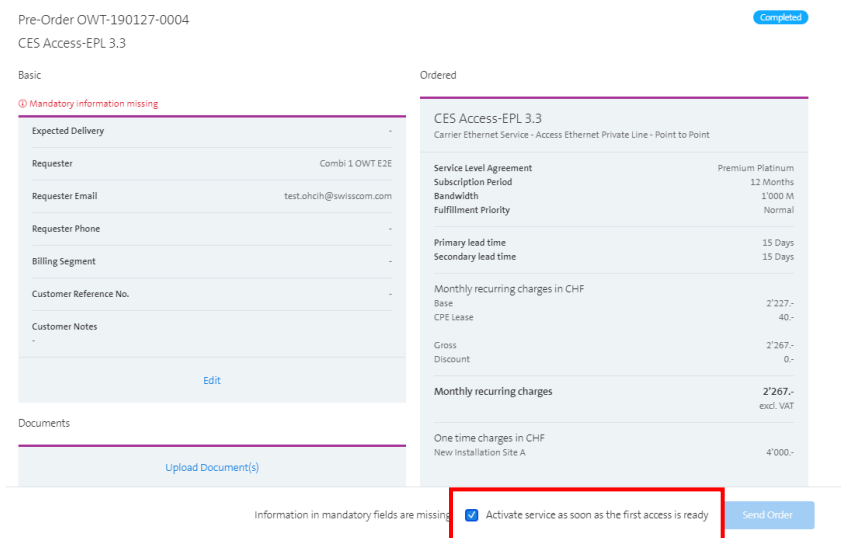

### 18.4 CES Partial Operation

This feature only applies to CES Premium Platinum.

As mentioned above, you have two options to activate a CES Premium Platinum Service.

1. Activate the primary temporarily as Premium Silver as soon as it is available. As soon as the secondary access is available, an upgrade to Premium Platinum will automatically be done. This way, the available part of the ordered service will be available to you as soon as possible. The technical term for this approach is "Partial Operation".
2. Activate the complete service when primary and secondary access will be finished.

You can choose between these two options by using the indicated check box.

### 18.8 Provide the house owner if network upgrade is required

A network upgrade usually involved digging work to lay a new cable to the building. Such activities require the permission of the house owner. After this release, there is an additional entry form to provide the contact information of the house owner. It is mandatory if the order involves a network upgrade.

#### Primary Access Site A House Owner

19 Release 3.2.0.9 (available from 7<sup>th</sup> January 2019)

19.1 My Address

You have now the possibility to store validated addresses within a request as "My Address". The portal then asks you to assign name to it. You can reuse such addresses later without entering the complete address again. You can search easily by the name you had previously assigned to that address.

19.1.1 Store a new address

Basically, any address can be stored as My Address. For a better overview, it is recommended to store only frequently reused addresses like PoPs or Data Centers.

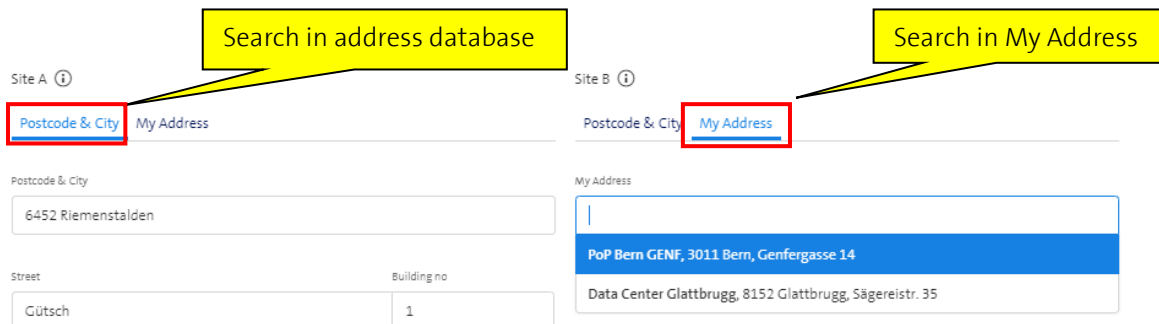

The screenshot shows two side-by-side address entry forms for 'Site A' and 'Site B'. Each form has tabs for 'Postcode & City' and 'My Address'. Site A's form contains: Postcode & City: 6452 Riemenstalden; Street: Langrüti; Building no: 1; Object Name: (empty). Site B's form contains: Postcode & City: 8152 Glattbrugg; Street: Sägereistr.; Building no: 35; Object Name: (empty). Below each form is a question: 'Would you like to save this address in My Address?' with a 'Create' button. A yellow callout box points to the 'Create' button on Site B with the text 'Store the displayed address as My Address'.

A modal will be shown where you must assign a meaningful name to the address to be stored.

The modal window is titled 'Save entry in My Address' and has a close button (X) in the top right. It contains a 'Title Address' field with the text 'Data Center Glattbrugg' and a green checkmark on the right. Below this field, the address '8152 Glattbrugg Sägereistr. 35' is displayed. At the bottom right, there is a blue 'Save' button.

### 19.1.2 Reuse a stored address in a request

When you create a new Request, you can search addresses alternatively in the general address database by selecting "Postcode & City" or in "My Addresses".

Site A ⓘ **Postcode & City** My Address

Postcode & City: 6452 Riemenstalden

Street: Güttsch Building no: 1

Site B ⓘ Postcode & City **My Address**

My Address: PoP Bern GENF, 3011 Bern, Genfergasse 14  
Data Center Glattbrugg, 8152 Glattbrugg, Sägereistr. 35

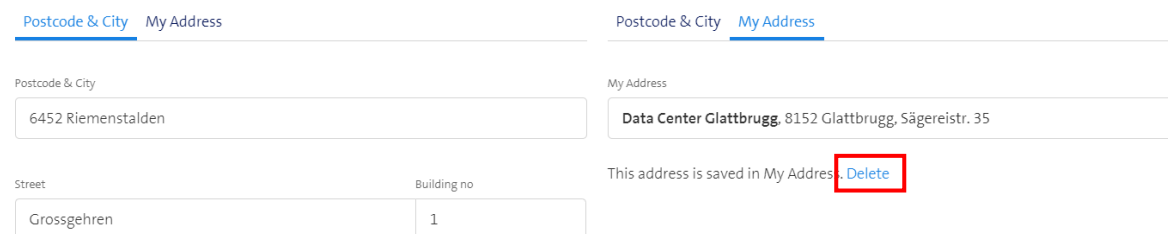

### 19.1.3 Display and remove stored addresses

You can list the stored addresses or delete addresses you do not need anymore.

 [Requests](#) [Offers](#) [Orders](#) [Installed Base](#) **My Address**

Title	Postcode & City	Address	Object Name	
PoP Bern GENF	3011 Bern	Genfergasse 14	-	<a href="#">Delete</a>
Data Center Glattbrugg	8152 Glattbrugg	Sägereistr. 35	-	<a href="#">Delete</a>

Moreover, you can also delete addresses within a request.

**Postcode & City** My Address

Postcode & City: 6452 Riemenstalden

Street: Grossgehren Building no: 1

**Postcode & City** My Address

My Address: **Data Center Glattbrugg, 8152 Glattbrugg, Sägereistr. 35**

Are you sure to delete the following entry? ✕

**Data Center Glattbrugg**  
8152 Glattbrugg  
Sägereistr. 35

Yes, delete

Cancel

## 19.2 Improved user guidance within the Request work flow

### 19.2.1 Allowing more than one Request with identical addresses

In the following example, there already exists a Request for these two addresses. Now, a new Request is to be created for a different use case. This was not possible before Release 3.2.0.9

Status	Title	Requester	Site A Primary Access	Site B Primary Access	Site A Secondary Access	Site B Secondary Access	All Over ID	Expiry Date
Offered	Bank John Wayne	Combi 1 OWT E2E	5000 Aarau Bahnhofplatz 1 (Customer Site)	8005 Zürich Hardstr. 235 (PoP)	-	-	OWT-181220-0002	20.03.2019

Now, it is possible to create a new Request with a different title if the existing Request has any status but "Open".

Status	Title	Requester	Site A Primary Access	Site B Primary Access	Site A Secondary Access	Site B Secondary Access	All Over ID	Expiry Date	Options
Offered	Bank John Wayne	Combi 1 OWT E2E	5000 Aarau Bahnhofplatz 1 (Customer Site)	8005 Zürich Hardstr. 235 (PoP)	-	-	OWT-181220-0002	20.03.2019	1
Open	Bank Terence Hill	Combi 1 OWT E2E	5000 Aarau Bahnhofplatz 1 (Customer Site)	8005 Zürich Hardstr. 235 (PoP)	-	-	-	20.03.2019	1

On the other hand, if the existing Request is in the status "Open" and you try to create a new Request with identical addresses, the portal will guide you to the existing Request. For a particular address combination, only one request in the status "Open" is allowed, to avoid data duplication.

#### Site A Primary Access

Address	5000 Aarau Bahnhofplatz 1
Price zone	Top-City

Send

Send a message to Swisscom

If the change is technically feasible and if the Order is not too far ahead to be changed, Swisscom will modify the Order according to your Request.

### 19.2.4 Repeat availability check before Direct Order

Already before Release 3.2.0.7, you could order a Service directly based on a Request (i.e. Direct Order). However, the availability check, done some time before when creating the Request might be outdated in some cases. For example, a network upgrade may have taken place or the one available fibres may have been used for other purposes in the meantime.

You have now the possibility to verify if the availability is still the same or if it has been changed in the meantime.

Request Bank Terence Hill

**20 Release 3.2.0.7 (available from 15<sup>th</sup> November 2018)**

**20.1 Improved labelling of some menu buttons**

Some labellings of menu buttons to add options to a request have been improved. For an improved user guidance, the labelling is now different, either if the first option or subsequent options are to be added to a request.

**Before this Release**

**20.2 Solved bug when adding of CLS Platinum options to a request**

If you wanted to add a CLS Platinum option to a request, you received an error message. This issue is solved now. You may now add any option of the standard Data Services product portfolio of Swisscom Wholesale.

### 20.3 New Feature "Direct Order"

Before the release, only orders based on a specific Offer was possible.

Now, you have the additional possibility to order Data Services with the SLAs Basic, Basic Light, Premium Silver and Silver Light directly without requesting an Offer first.
