Postponement of the replacement of the FTTH Coverage Lists

Replacement of the FTTH coverage lists in the WSG Information

Background:

With the revision of the AKFT, the data management of the planned and orderable fiber locations was standardized. To this end, new lists with the prefix 55 will be displayed to the ISPs instead of the lists with the prefix 35:

- Prefix 55: ISP und CoPa

The digits "999999_" preceding the names of the 35 lists are no longer displayed in the 55 lists.

During a three-month transition period, both lists will be displayed in parallel.

Procedure:

- Activation of 55 lists are now available on WSG
- Ongoing public testing of the new WSG lists (Launch in Q2 2025)
- Removal of the 35 lists in Q2 2025

Do not hesitate to contact us at bbcs.service@swisscom.com if you have any questions.

Service Fulfillment

Change in Process of Copper Interim Use

In case of ordering a BBCS connection on a Central Office which can no longer be operated by Swisscom due to the termination of the lease, it is no longer necessary to enter a disconnection date.

- WSG will no longer automatically create the DISCONNECT order when the CREATE order is entered.
All ISPs are requested to submit the DISCONNECT order at least 30 days before the end date of service availability.
- If no DISCONNECT order is entered by the ISP, WSG generates a DISCONNECT order 30 days before the Service Availability End Date is reached.
This order generated by WSG cannot be modified by the ISP.
- For addresses that have reached the "End of Service Date", the unavailability of copper will be displayed in the "Service Availability Qualification" (SAQ).
As soon as the "End of Service Date" is reached, the SAQ returns the following error message:
 - QIX „A copper connection is no longer possible at this location.”

Responses

VDSL, BBCS_Standalone		
— Best Effort, Streaming, Real Time	nok - 64BOL - DELOC	64 BOL 3 10000 1
Qualif Result Detail	Result Code: QIX	Result Comment: A copper connection is no longer possible at this location.

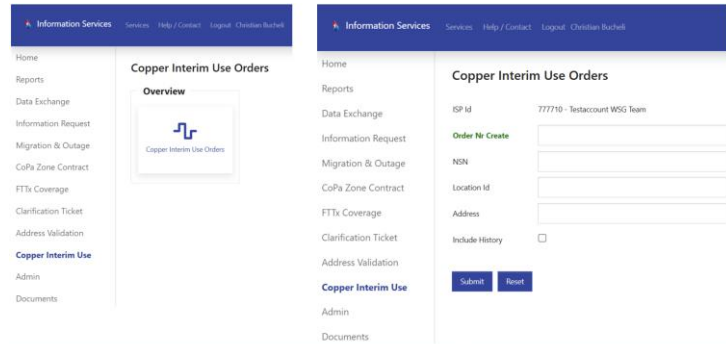

Service Fulfillment

Change in Process of Copper Interim Use

The orders affected by "Copper Interim Use" can be viewed by the ISP in the "WSG Information Service" (GUI + B2B). Shifts of "EndOfServiceDate" are visible as well.

The list can also be downloaded from the GUI. It is available in "WSG Information Services".

Summary:

Copper Interim Use Orders Summary

Number of entries = 265

Pre-Info: Optimization of Migration Project Reason ID

As part of the optimization of the Migration Project Reason IDs, minor changes will be implemented that may impact your experience as an ISP. These updates are aimed in enhancing efficiency and streamlining processes.

- **What's Changing:**
Minor adjustments related to the optimization of Migration Project Reason IDs.
- **Timeline:**
The changes will take effect as part of the March Release 2025.
- **Next Steps:**
Detailed information regarding these updates will be provided in the upcoming monthly Release Information communication.

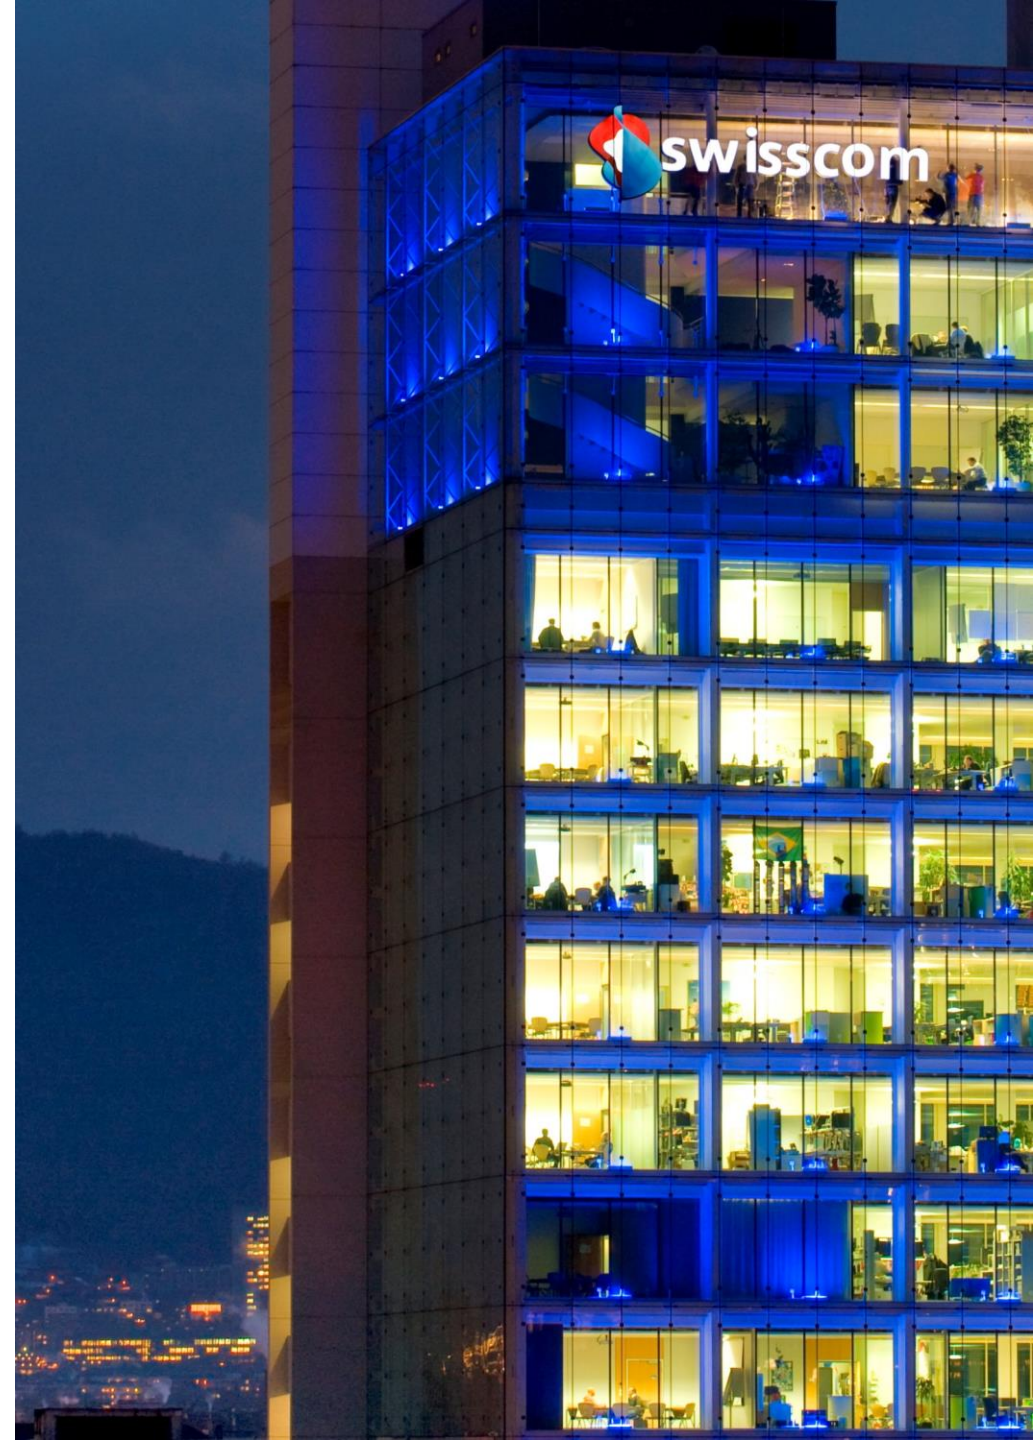

WSG

Pre-Info: "Instant Migration"

As we announced in autumn 2024, we have now started the first preparatory work in IT for Instant Migration.

As a result, you will see more information on Instant Migration in the upcoming releases. The release of the entire function is still scheduled for October 2025.
